For application to the critical ground-line area of standing poles and posts... checks decay and insect attack, Extends Service Life of Standing Poles

ACCEPTED
July 19, 1972
M. 1022-393

CONTAINING SODIUM TETRABORATE (BORAX)

FOR CONTROL OF DECAY AND AIDS IN THE PROTECTION AGAINST TERMITES.

HOW TO APPLY CHAPMAN TIMPREG PAK

1. Remove earth from around pole to a depth of 18 inches.
2. Use a steel brush to remove dirt and loose, decayed wood. Clean pole well.
3. Inspect pole for extent of decay. If found to be sub-standard it should be replaced.
4. If left in place, apply opened Timpreg B Pak by wrapping it around pole with preservative grease next to pole and bandage extending three inches above ground line. Overlap ends of Timpreg B Pak to insure complete coverage of pole with preservative grease. Wrap bandages tightly, stabling or nailing in place.
5. Back-fill and tamp dirt firmly, mounding within an inch of bandage top. Do not pile back-fill above top edge of Timpreg-B Pak.

INGREDIENTS

ACTIVE INGREDIENTS:	
Pentachlorophenol.....	8.95%*
Other chlorinated phenols.....	1.04%*
Sodium tetraborate, anhydrous.....	15.50%
Aromatic petroleum derivative solvent.....	67.74%
INERT INGREDIENTS:	
Total.....	100.00%

*Equivalent to 10.41% technical pentachlorophenol as defined by Federal Specification TT-W-570a
