PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes substantial but temporary eye injury. Harmful or fatal if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Avoid breathing spray mists or vapors. Wear goggles or face shield and rubber gloves when handling Copper Naphthenate WR.

DO NOT breathe vapors or mist during brush, roll, spray, and dip applications. Wear a NIOSH/MHSA-approved mist/vapor respirator when spraying for continued or prolonged use of this product or for frequent use of the product.

In case of medical questions, emergencies or accidents involving this product, call Chemtrec at 1-800-424-9300.

Application of this product may produce strong, lingering, unpleasant odor.

FIRST AID

STATEMENT OF PRACTICAL TREATMENT

IF IN EYES: Immediately flush with large quantity of water and get medical attention.

IF ON SKIN: Flush with water. Remove and wash contaminated clothing before re-use.

IF SWALLOWED: Do not induce vomiting. CALL A DOCTOR.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS

Do not store or use near heat or open flame.

ACCEPTED

COPPER NAPHTHENATE WR

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Use only the application method specified for a particular use.

Products repackaged from this product must be labeled for "Exterior Use Only," and must bear all the statements listed under the section entitled Precautionary Statements and the repackager(s) telephone number.

Apply to all exterior wood surfaces exposed to moisture or weather. Make certain all areas are fully treated to get maximum benefits. Do Not apply on or near water, wetlands, or other areas where contamination of surface waters could occur.

Wood treated with COPPER NAPHTHENATE WR has a green color that fades slowly over time. Allow 24 hours or longer after application of the preservative prior to painting.

FOR TREATMENT BY DIP, ROLLER, BRUSH, AND SPRAYING

Wood should be free of bark, dry and well seasoned before treatment. Dip treatment is the most effective. A three minute immersion is adequate for most applications. Since a longer dip time achieves a higher retention of preservative in the wood, 12 to 48 hours immersion time is required for wood placed in contact with the soil, or used in construction of boats, piers, and other large wooden structures.

Brush, roller, or spray treatments are satisfactory for above ground applications, but should be used for ground contact applications only when dipping is not possible. In such cases, apply at least 2 coats by brush, roller, or spray treatments, allowing at least 1 hour between each coat.

Rope and burlap should be dip soaked or sprayed until wet.

COVERAGE: One gallon covers 100 - 300 sq. ft. depending upon the wood species, porosity of the wood, and method of application.

SURFACES TO BE PAINTED LATER: Allow 48 hours before painting. Expect a slight discoloration after the first coat of white or light paint. Subsequent coats will be required to completely cover.

CLEAN UP: Clean equipment promptly with paint thinner, mineral spirits or turpentine.

4015

RECOMMENDED USES

COPPER NAPHTHENATE WR is recommended for all wooden items in contact with either fresh or salt water, including boats, piers, and docks. Pretreatment only. Do not apply at sites on or near water or wetlands.

COPPER NAPHTHENATE WR may be applied to wood products such as landscape timbers, wooden seedling trays, plant and flower boxes for ornamental plantings.

COPPER NAPHTHENATE WR may also be used on windows, window frames, stairs, porches, steps, fence pickets, fence rails, and ropes.

Powderpost beetles and termites are killed by application of this preservative. These insects will not attack properly treated wood. Surfaces treated with COPPER NAPHTHENATE WR are non-toxic to plants and flowers.

Wood treated with Copper Naphthenate WR should not be used where it may come in contact with food, feed or potable water.

ACCEPTED

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food or feed by storage or disposal.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: U.S. Quart /1 Gallon Containers: Do not reuse empty container. Securely wrap original container in several layers of newspaper and discard in trash.

GENERAL: Consult Federal, State or local disposal authorities for approved alternative procedures.

WARRANTY AND LIMITATION OF DAMAGES

Neither IBC Manufacturing Company nor the seller makes any representation or warranty, express or implied, concerning the use of this material, other than indicated on the label. Neither shall be held responsible in any manner for any personal injury or property damage or other type of loss resulting from improper handling, storage or use of this material. The buyer accepts and uses this material on these conditions.

Notes: Not part of the Label Review.

This label was revised in response to the review initiated by the Special Review Branch. The Naphthenate Salts Research Task Force decided not to pursue indoor uses for copper naphthenate. Sue Crescenzi hand delivered this revised label to Tom Moriarty of EPA on March 7, 1997. Label Amendment - Resubmission of Label in response to Agency's letter of April 15, 1997.
