

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
& DOMESTIC ANIMALS
DANGER

Corrosive. Causes irreversible eye damage. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles, face shield and rubber gloves when handling. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Do not breathe spray mist.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water or wetlands. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL & CHEMICAL HAZARDS

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

PROHIBITION: Do not contaminate water, food, or feed by storage or disposal.
PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

EPA Reg. No. 1022-~~1022~~ 29 1984
 EPA Est. No. 10021
 This is a Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 1022-485

Q-San Water Repellent Wood Preservative Solution requires no dilution before use. Dilution is required, following label directions.

TREATMENT OF RE-USABLE CONTAINERS SUCH AS FIELD PICKING BOXES

Immersion of boxes for 30 seconds if they are made of species such as oak, gum, poplar, cottonwood, pine. Drain thoroughly, slack and allow solvent to evaporate before use. This will require about 48 hours when the weather is warm and dry. During cold or rainy weather this is best followed by longer drying period. Boxes should preferably be dipped when new. If old boxes are dipped, make sure they are free of debris that would retard penetration of the solution. Use 1/2 gallon of Q-San and 1/2 gallon of water as the diluent. 24 hours if VM and P-naphtha is used as the diluent.

TREATMENT OF ONE TRIP CONTAINERS

Where mold prevention on containers such as bean or tomato hamper, bushel baskets and the like is desired, an instantaneous immersion is sufficient. The containers should then be drained and the solvent allowed to evaporate.

SEVERE EXPOSURE APPLICATIONS

For treatment of wood to be used in contact with soil, higher concentrations are desirable and longer treating periods are usually necessary. Wood used in very damp places where condensation is likely to be heavy (such as inside refrigerators, in showers or wash rooms) also need longer treatment. For example, air dried southern yellow pine sapwood 1 dimension and boards will require one to two hours of soaking. Kiln dried southern yellow pine sapwood boards require about 1 hour of soaking.

GREEN HOUSES AND GARDENING

Treat green house flats with Q-San Water Repellent Wood Preservative to prevent decay, rot, and stain. After the solvent evaporates no injury will result to the young plants. Tomato or bean stakes will last much longer if treated with Q-San Water Repellent Wood Preservative. Plants or fruit will not be harmed by the treated wood. For treating follow directions listed under "Severe Exposure Application." Other wood species should be soaked in Q-San Water Repellent Wood Preservative as follows: Ash, Hickory, Hackberry, Red Oak, Larch, White Pine 24 hours; Elm, Black Gum 24 hours.

NOTICE

Neither Chapman Chemical Company nor the seller makes any representation or warranty, express or implied, concerning the use of this material, other than indicated on the label. Neither shall be held responsible in any manner for any personal injury or property damage or other type of loss resulting from improper handling, storage or use of this material. The buyer accepts and uses this material on their own responsibility.
