PRECAUTIONARY STATEMENT HAZARDS TO HUMANS & DOMESTIC ANIMALS

U.S. for the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 16,22-493

**CONTROLS ROT, STAIN,
MOLD, TERMITES**

CAUTION

Harmful if swallowed. Causes eye injury.
Do not get in eyes, on skin or on clothing.
Do not breathe fumes. Wear goggles and rubber gloves when handling.
Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water or wetlands. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its label.

STORAGE AND DISPOSAL

PROHIBITIONS. Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL. Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

PQ-15 is a concentrate, do not use without diluting. To make a 0.25% copper 8-quinolinolate ready-to-use solution, dilute one volume of PQ-15 with 5 volumes of petroleum oil weighing approximately 6.6 pounds per gallon. For dilution with lighter or heavier oils, adjust dilution accordingly.

INGREDIENTS

ACTIVE INGREDIENT	
Copper 8-quinolinolate	1.38%
INERT INGREDIENTS	98.62%
TOTAL	100.0%

This product meets N.W.M.A. Swellograph Water Repellency requirements when diluted 1 to 5 with Mineral Spirits.

KEEP OUT OF REACH OF CHILDREN

CAUTION

STATEMENT OF PRACTICAL TREATMENT

- If swallowed - Do not induce vomiting. CALL A DOCTOR IMMEDIATELY.
- If on skin - Wash immediately with soap and water. Wash contaminated clothing before reuse.
- If in eyes - Flush eyes with plenty of water. Get medical attention if irritation persists.

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS

Ready-to-use solution can be applied to poles, posts, and other lumber products by pressure treating, dipping, soaking, spraying, or brushing. The most effective treatment for ground contact is obtained with pressure treating or extended soaking where deep penetration and high absorption are obtained. With spraying or brushing multiple flowing coats should be applied. PQ-15 ready-to-use solution is especially recommended for dimensional stability for millwork. It provides a barrier to termite attack and all construction members must be treated before installation. If already termite infested, wood replacement is absolutely necessary prior to establishing control over reinfestation.

PQ-15 diluted as above can be applied to textiles, such as canvas and burlap, rope, leather, and other porous substrates that are subject to fungal and termite degradation. A dipping time sufficient to allow complete penetration is required and would range from 3 to 10 minutes depending upon the tightness of weave and diameter of the elements.

Where subsequent paintability is required, use a volatile petroleum carrier, such as mineral spirits or Stoddard solvent.

NOTICE

Neither Chapman Chemical Company nor the seller makes any representation or warranty, express or implied, concerning use of this material, other than indicated on the label. Neither shall be held responsible in any manner for any personal injury or property handling, storage or use of this material. The buyer accepts and uses this material on these conditions.
