WOOD PRESERVATIVE READY-TO-USE

. A.

BEST COPY AVAILABLE

Π

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not use water collected from treated wood for potable water.

CUNAPSOL-1 LV requires no dilution before use. Use as received, following label directions. It is intended for wood products that usually require painting or stenciling such as millwork and the like or in special situations to treat lumber for long storage in the open or in ground contact by simple nonpressure method.

The best results will be obtained if wood to be treated is immersed for 3 minutes or longer. If dipping is not possible, 2 liberal brush or spray applications should be applied. Allow at least 1 hour between applications. Move certain all areas are fully treated to get the maximum benefits. Allow 24 hours or longer after application of the preservative prior to painting.

GROUND CONTACT: Seasoned or green wood may be treated. Make certain the wood is free of bark, then immerse in CUNAPSOL-1 LV for 12 to 48 hours or until the sapwood is completely penetrated.

Water repellents may be admixed with CUNAPSOL-1 LV to improve dimensional stability of the treated wood. Colorants may be admixed for aesthetics and additional u v protection. This product is compatible and may be colored by the universal machine colorants employed to color oil or water based paints. Note that colorants weather differently, at J that color development varies with species, grain and-weed undertone.

Windows, window frames, doors, stairs, porches, siding, shingles, wellises, steps, sub-fictoring, interior frim, wall paneling, furniture, tenee pickets and tails, furring strips, arbors, flooring and beverage cases. Rowder post beetles which invade furniture, flooring and structural lumber are killed by application of this preservative. These insects will not attack treated wood. Wood rot protection of interior use wood is only needed on wood which is subject to frequent or prolonged wetting (e.g. condensation, rain seepage).

CUNAPSOL-1 LV may also be used on fence posts, poles, foundation silis, decks, boats and all wood exposed to moisture or weather.

Due to its very low phytotoxicity, CUNAPSOL-1 LV can be used to treat wood for greenhouses, nursery flats, etc.

In addition to preventing decay, blue stain, and insect attack on wood, CUNAPSOL-1 LV controls warping, swelling, shrinking and end checking caused by changes in moisture content of lumber and plywood products. Wood to be protected against subterranean termites should be treated before use in construction. Termites will not attack wood treated with CUNAPSOL-1 LV Wood Preservative.

CUNAPSOL-1 LV may be used where livestock and dairy animals may come in contact with the treated wood. Wood treated with CUNAPSOL-1 LV should not be used where it may come in contact with food, feed or potable water. See Technical Bulletins for additional uses.

WARRANTY AND LIMITATION OF DAMAGES

Seller warrants that this material conforms to its chemicol description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and Buyer assumes the risk of any use contrary to such directions. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY, INCLUDING ANY OTHER EXPRESS OR IMPLIED WARRANTY, OF FITNESS OR OF MERCHANTABILITY, AND NO AGENT OF SELLER IS AUTHORIZED TO DO SO EXCEPT IN WRITING WITH A SPECIFIC REFERENCE TO THIS WARRANTY. In no event shall Seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.
