NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

CHAPCO CU-NAP 400

ACCEPTED
with COMMENTS
FUNGICIDE in EPA Letter Dated:

END USE PRODUCT

NOV 14 1980

Under the Federal Insecticide, Fungicide and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

INGREDIENT STATEMENT:

Active Ingredient:	
Copper Naphthenate	40%
Inert Ingredients:	60%
Total	100%

*Equivalent to 4% metallic copper.

KEEP OUT OF REACH OF CHILDREN
WARNING
STATEMENT OF PRACTICAL TREATMENT

IF IN EYES: Immediately flush with large quantity of water and get medical attention.

IF ON SKIN: Flush with water. Remove and wash contaminated clothing before re-use.

IF SWALLOWED: Do not induce vomiting. CALL A DOCTOR.

SEE RIGHT PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Chapco Cu-Nap 400 is a concentrate and requires dilution with water before use. To treat wood for use in moderate decay hazard locations, dilute one volume of Chapco Cu-Nap 400 with 3 volumes of water. To treat wood for use in high decay hazard locations, such as ground contact, dilute one volume of Chapco Cu-Nap 400 with 1 volume of water.

Above ground contact: The best results will be obtained if wood to be treated is immersed for 1 minute or longer. If dipping is not possible, 2 liberal brush or spray applications should be applied. Allow at least 1 hour between applications. Make certain all areas are fully treated to get the maximum benefits.

MANUFACTURED BY
CHAPMAN CHEMICAL COMPANY
MEMPHIS, TENNESSEE 38109

DIRECTIONS FOR USE (Continued)

Ground contact: Seasoned or green wood may be treated. Make certain the wood is free of bark, then immerse in Chapco Cu-Nap 400 for 12 to 48 hours or until the sapwood is completely penetrated.

Water repellents may be admixed with Chapco Cu-Nap 400 to improve dimensional stability of the treated wood. Colorants may be admixed for aesthetics and additional UV protection. This product is compatible and may be colored by the universal machine colorants employed to color oil or water based paints. Note that colorants weather differently, and that color development varies with species, grain and wood undertone.

RECOMMENDED FOR

Fences, siding, shingles, trellises, steps, sub-flooring, furniture, fence pickets, and rails, furring strips, arbors, and flooring. Powder post beetles which invade furniture, flooring and structural lumber are killed by application of this preservative. These insects will not attack the treated wood. Wood rot protection of interior use wood is only needed on wood which is subject to frequent or prolonged wetting (e.g., condensation, rain seepage).

Chapco Cu-Nap 400 may also be used on fence posts, poles, foundation sills, decks, boats and all wood exposed to moisture or weather.

Due to its very low phytotoxicity, Chapco Cu-Nap 400 can be used to treat wood for greenhouses, nursery flats, etc.

In addition to preventing decay, blue stain, and insect attack on wood, Chapco Cu-Nap 400 controls warping, swelling, shrinking and end checking caused by changes in moisture content of lumber and plywood products.

Wood to be protected against subterranean termites should be treated before use in construction. Termites will not attack wood treated with Chapco Cu-Nap 400 wood preservative.

Chapco Cu-Nap 400 may be used where livestock and dairy animals may come in contact with the treated wood. Wood treated with Chapco Cu-Nap 400 should not be used where it may come in contact with food, feed or potable water.

STORAGE & DISPOSAL

PROHIBITIONS:
Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL:
Pesticide, spray mixture or rinsate that cannot be used or chemically reprocessed should be disposed of according to procedures approved by Federal, State, or local authorities.

CONTAINER DISPOSAL:
Triple rinse (or equivalent). Then offer for recycling and reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities.

GENERAL:
Consult Federal, State, or local disposal authorities for approved alternative procedures.

Net C
PRECAUTION
Hazards to Hu

Harmful if swallowed. Avoid contact with skin. Avoid breathing vapor. Wash with soap and water. Clothing should be removed before reusing.

PHYSICAL
Harmful if swallowed. Avoid contact with children. Do not heat or open flame.

ENVIRONMENTAL
Do not contaminate water, food or feed by storage or disposal.
