

FOR DISEASES IN TURF GRASS

9-508-1

Net Weight 15 oz

FOR DISEASES IN TURF EDGES

AN ANTIBIOTIC FUNGICIDE

ACTI-DIONE TGF

Diseases of Ornamental Plants and Nursery Stock

Acti-dione TGF can be used in the treatment of:

Cedar-Apple Rust and Cedar-Hawthorn Rust on Cedar Trees

Hawthorn Leaf Blight on Hawthorns

Sour Cherry Leafspot and Powdery Mildew on Non-Bearing Cherry Trees

Witches Broom Powdery Mildew on California Live Oak

Ask your supplier for a separate direction sheet with recommended rates and details of uses

Compatibility

Acti-dione TGF may be applied with most insecticides and fertilizers. However, do not mix with chlordane or alkaline materials such as lime

Important! Read Before Use

By using this product user accepts the following conditions, warranty, disclaimer of warranties and limitations of liability.

Conditions

The directions for use of this product are believed to be adequate and should be followed carefully. However, because of extreme weather and soil conditions, manner of use and other factors beyond TUCO's control, it is impossible for TUCO to eliminate all risks associated with use of this product. As a result, crop injury or ineffectiveness is always possible

Warranty and Disclaimer of Warranties

TUCO warrants that this material conforms to the chemical description on the label and is reasonably fit for use under the directions and conditions on this label. **TUCO AND SELLER MAKE NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS, MERCHANTABILITY OR OTHERWISE.**

Limitation of Liability

The liability of TUCO or Seller for damages arising from the use of this product is limited to the replacement cost of the product used and shall not include any consequential damages such as loss of profits or other values.

No Change of Liability

No one (other than an authorized agent of TUCO) is authorized to make any other warranty, or change the above conditions, disclaimer or limitations and then only if in writing and with a specific reference to this label.

NEVER USE FOR HOUSEHOLD PURPOSES

For agricultural use and for sale to service persons. Do not store in or around the home. Read all label directions, precautions, and conditions of sale before using Acti-dione TGF. Acti-dione TGF is an antibiotic fungicide effective for the prevention and control of certain fungus diseases of turf grasses and ornamental or nursery plantings.

WARNING!

Harmful or fatal if swallowed. May be irritating if contacted or inhaled. Avoid contact with skin, eyes, or clothing. Use rubber gloves when mixing or spraying. Wash thoroughly after handling. Avoid breathing dust. Do not contaminate feed and foodstuffs. Do not use on pasture grasses or graze treated areas. Do not feed clippings to livestock. Do not reuse container. Destroy when empty.

This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Keep out of any body of water. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment, or disposal of wastes. Do not apply when weather conditions favor drift from areas treated. Apply this product only as specified on this label.

In case of contact, immediately flush eyes with plenty of water for 15 minutes. Wash skin immediately with soap and water.

If Swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

(3-[2-(3,5-dimethyl-2-oxocyclohexyl)-2-hydroxyethyl]-glutarimide)

Inert Ingredients 97.9% w/w

100.0% w/w

USE FOR HOUSEHOLD PURPOSES

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Equivalents: 1 oz Acti-dione TGF = 3 standard level table-spoonfuls.

Dollarspot, melting-out, fading-out, rust, powdery mildew and leafspot on Bentgrass, fescue, ryegrass and bluegrass turf

How Much to Use

One package (15 oz) of Acti-dione TGF in 75 gallons of water will treat 15,000 sq ft or three average golf greens. For small areas, use 1 oz of Acti-dione TGF per 1,000 sq ft in 5 gallons of water.

For severe disease problems, use two packages (30 oz) of Acti-dione TGF in 75 gallons of water to treat 15,000 sq ft, or 2 oz of Acti-dione TGF per 1,000 sq ft in 5 gallons of water. Ferrous sulfate may be added to the tank mixture at the rate of 1/2 lb per 15,000 sq ft (1/2 oz per 1,000 sq ft) to enhance the activity of Acti-dione and correct iron chlorosis of the grass.

How to Apply

Prepare a fresh mixture each day spraying is done. With agitator running, add recommended quantity of Acti-dione TGF to spray tank containing one-half the necessary amount of water. Add ferrous sulfate if desired. Add rest of water while agitator is running.

Spray the mixture on the grass using a power sprayer, hand sprayer or hose-on proportioner. Allow the grass to dry. Do not water in.

How often Acti-dione TGF is applied depends on weather conditions. Ordinarily one application every 7 to 10 days is recommended, but hot, humid conditions which are favorable for fungus disease may make it necessary to spray every 5 to 7 days.

A special program is recommended. Ask your supplier for the separate direction sheet with details of this program.
