

DIRECTIONS FOR USE

SUPER FLY-BAN is a ready to use, highly effective product that is artificially colored to prevent accidental usage. No mixing preparation or application equipment is required to use the material as a dry bait. By means of the handy shaker top canister, scatter the bait evenly on floors or other horizontal surfaces where flies alight or congregate in factories picnic areas, patios, kennels, dairy barns, calf barns, hog barns, poultry houses, livestock loafing sheds, kennels, garbage areas, outdoor latrines and dumps. Do NOT use in edible products areas of food processing plants. Good sanitation measures and proper disposal of wastes are necessary for effective fly control.

APPLICATION RATES

Apply to floors or other areas mentioned above at the rate of 1 lb. per 2000 sq. feet. Apply evenly over manure piles and floor areas where flies breed. Applications should be made daily until the fly population is under control. Then applications should be repeated every few days as necessary. Baits should be placed in areas not accessible to children, pets wildlife and domestic animals.

FOR MAGGOT CONTROL

Apply SUPER FLY-BAN at a rate of 1 lb. per 500 sq. ft. of fly breeding area, garbage dumps and manure piles. Repeated applications will be
