DIRECTIONS

Mix BAR-X Emulsifiable Fly Spray with water at proper dilution. First, put the required amount into sprayer or mixing container. Then add water according to directions, and mix thoroughly before using. **IMPORTANT:** Mix fresh solution before each use! Apply with pressure sprayer or you can sponge it on horses. Make sure animal's coat is thoroughly wet all over with the solution. Avoid getting solution into the animal's eyes.

Avoid wetting the hides of animals.

HORSES: To protect them from Horn Flies, House Flies, Gnats and Mosquitoes, apply at 1 to 7 dilution. Each pint of concentrate makes 1 gallon of finished spray. Repeat application every 3 or 4 days or as often as needed.

Where Horse Flies or Deer Flies (Tabanids), or Stable Flies are a problem, apply at 1 to 4 dilution, and repeat application as often as needed.
