PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: CORROSIVE. CAUSES EYE DAMAGE AND SKIN IRRITATION. Do not get in eyes, on skin, or on clothing. Protect eyes and skin when handling; harmful if swallowed. Do not consume food or food stuffs.

FIRST AID: **Eyes:** In case of contact, immediately flush with plenty of water for at least 15 minutes. Get medical attention at once. **Skin:** In case of contact, flush with plenty of water. If irritation develops, get medical attention. **Inhalation:** If inhaled, drink promptly. Leave premises at once. Avoid alcohol. Get medical attention.

BACTERGENT

CLEANER SANITIZER DISINFECTANT

Active ingredient:		
IODINE*		1.75%
Inert Ingredients:		98.25%
Total		100.00%

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Sanitizer in Food Processing Plants, Restaurants and Institutional Food Service Areas:

Remove all heavy soils and thoroughly clean surfaces. Use a potable water rinse prior to application of the sanitizing solution. To sanitize previously cleaned and rinsed food processing equipment, eating utensils and glassware, use 1 oz. of BACTERGENT to 5 gallons of water (25 ppm titratable iodine). Apply generously with suitable applicator such as a brush or sponge to wet the surfaces thoroughly. Allow a minimum 1 minute contact time. Allow to drain thoroughly, but do not rinse. Air dry.

For small articles and utensils, use a bath containing 1 oz. BACTERGENT to 5 gallons water (25 ppm titratable iodine). Allow items to soak a minimum of 1 minute. Allow to drain thoroughly, but do not rinse. Air dry.

Do not wash silver or silver plate with BACTERGENT since staining may result.

Cleaning and Disinfecting in Hospitals and General Institutional Use: Operating rooms and equipment, patient rooms, animal cages and rooms, bed frames, and similar hard surfaces.

For disinfecting and cleaning in one operation, use 6 oz. of BACTERGENT to 5 gallons water (150 ppm titratable iodine). Apply with suitable applicator such as sponge or mop so as to wet the surfaces thoroughly for a minimum contact time of 10 minutes. For extra dry surfaces, clean gross first then proceed as above. Rinse with potable water.

For disinfecting surgical instruments, thermometers, rubber gloves, tubing and glassware, articles should be thoroughly cleaned of all blood, serum and other soils. Use 4 oz. BACTERGENT per 5 gallons water (100 ppm titratable iodine). Allow to soak a minimum of 10 minutes or until next use. Rinse with potable water.

CONTAINER DISPOSAL:
 Rinse empty container thoroughly with water and discard in trash collection. DO NOT REUSE EMPTY CONTAINER.

BACTERGENT is a sanitizer requiring no rinse after use on food processing equipment, glassware and eating utensils. BACTERGENT is not adversely affected as a sanitizing rinse in water hardness up to 500 ppm CaCO₃.

Absent to brown color of use-dilution is an indicator of germicidal strength. A fresh solution should be prepared each day or more frequently if noticeable change occurs in the initial color of solution.

USES: Recommended for general use in hospitals, restaurants, food processing plants, food service areas and for general institutional uses. A sanitizer for food contact surfaces. A one-step cleaner disinfectant containing iodine as the broad-spectrum germicide complexed with nonionic surfactants.

BACTERGENT, when used at 150 ppm iodine, is effective for solid surfaces as a one-step cleaner disinfectant against bacteria and pathogenic fungi.

BACTERGENT is effective against influenza A2 (Hong Kong) and Herpes Simplex Type 1 viruses on environmental surfaces as a one-step cleaner disinfectant at 75 ppm iodine.

BACTERGENT can also be used at 100 ppm iodine as a disinfectant against bacteria, pathogenic fungi, and as a tuberculocide on pre-cleaned environmental surfaces.

*Iodine from Nonvolatile Iodine Oxypolyoxetene Iodine complex

DANGER
KEEP OUT OF REACH OF CHILDREN
