FLEA-SLAY

DIRECTIONS

Apply FLEA-SLAY beginning at the head, neck and ears, and work back and down to the tail, under belly and under fore and hind legs, dusting the powder on and working it thoroughly through the hair and on the skin.

Treatment for the cat may be made easier by dusting on the powder, and combing and brushing it through the fur to the skin. For best results, wrap cat or kitten in towel for five minutes after applying FLEA-SLAY.

Repeat treatment in five or ten days to get any newly hatched eggs.

Dr. Daniels famous Cat Remedies have been "PURR"essionally - Formulated, Produced and Used by a licensed graduated Veterinarian.
