

DOLCOPINE

FRAGRANT INDUSTRIAL DISINFECTANT and DEODORIZER

For factories, warehouses, institutions, schools, offices, theaters, hotels and stores.

GERMICIDAL USES

AS A DISINFECTANT: For industrial and institutional disinfection of walls, floors, sinks, drains, toilet bowls, urinals and garbage receptacles, use 4 ounces to 3 gallons of water (approximately one-half cupful to a pail). Always stir briskly when making dilutions to be sure material is thoroughly mixed. Wet surfaces thoroughly with clean mop, brush, cloth or sponge.

NON-GERMICIDAL USES

AS A CLEANER: For washing floors and varnished surfaces, use one-half cupful to a pail of water. Mop or scrub. This material does not dull varnished surfaces. It is not corrosive to metals.

AS A DEODORIZER: This product is a powerful deodorizer of proven merit. The intense, concentrated odor value permits its use at liberal dilution. A pleasant pine fragrance quickly replaces foul odors. A little goes a long way. For stables, kennels and out-houses, use one-third cup to a pail of water. Mop, spray or sprinkle the premises thoroughly.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid contact with skin, eyes or clothing. Avoid contamination of food.

PHENOL COEFFICIENT 5.0 A.O.A.C. METHOD

ACTIVE INGREDIENTS: Pine Oil, Soap	91.5%
INERT INGREDIENT: Water	8.5%
TOTAL	100.0%
