

DIRECTIONS

For standard spraying strength dilute 1 to 400. This strength solution is used on dandelions and plantains. Apply when weeds are young and actively growing. Wet foliage thoroughly if spot spraying. For area spraying use 150 gallons to an acre. For Poison Ivy, use double strength. Spray leaves thoroughly. Do not allow the spray to drift on valuable plants. Such drift may injure tomatoes, beans, peas, and many ornamentals. A coarse spray is less likely to drift. Do not store near fertilizers, seeds, insecticides, or fungicides. The effectiveness of the spray is much diminished at temperatures below 50°. For best results use on warm, clear days. Clean sprayer thoroughly after using if it is to be used for other purposes. Traces of this weed killer are removed only by thorough cleaning with Dolge Ban, ammonia water, trisodium phosphate, or thorough flushing with water and activated charcoal. Unless this is done and insecticides are subsequently used in same sprayer damage to sensitive plants may result.

E.W.T. Weed Killer will not kill all weeds. It is a selective weed-killer, most effective on broad leaf weeds. It will kill or control the following: Bindweed, Mustard, Canada Thistle, Ragweed, Goldenrod, Plantain, Mallow, Dandelion, Sorrel, Chickenweed, Smartweed, and Purslane. It will kill Poison Ivy, Wild Honeysuckle, and Virginia Creeper. Used as directed, it will not harm lawn or turf grasses, except Bent. White clover may be severely damaged. This weed killer cannot be used on lawns of St. Augustine grass. Weeds die very slowly from its effects, often not showing any change up to six days. The killing is gradually completed in three to four weeks for the more resistant weeds.

Do not apply on Dichondra.

Do not reuse container. Destroy when empty.

ACTIVE INGREDIENT: Diethanolamine salt of 2,4-dichlorophenoxyacetic acid (equivalent to 2,4-dichlorophenoxyacetic acid 33.6%)	49.6%
INERT INGREDIENTS	50.4%

E.W.T.

A SELECTIVE WEED-KILLER 2,4-D AMINE TYPE

**KILLS DANDELIONS, POISON IVY
WILL NOT HARM USUAL LAWN GRASSES**

CAUTION

KEEP OUT OF REACH OF CHILDREN
HARMFUL IF SWALLOWED
AVOID CONTACT WITH SKIN, EYES OR CLOTHING
Do Not Apply to Newly Seeded Areas
