

DOLCOMIST

**A concentrated insecticide especially prepared
for use in fogging machines or mist sprayers**

For use in factories, warehouses, institutions, hospitals, restaurants, hotels, all types of food and beverage processing establishments, bakeries, flour mills, meat and egg packing plants, milk and dairy product producers, breweries, canneries, and all places requiring effective insect control.

DIRECTIONS

FLIES, MOSQUITOES. Close all windows and doors. Thoroughly fog room with fine mist-like spray using one-half ounce per thousand cubic feet. Keep room closed for at least ten minutes.

ROACHES. Direct spray at hiding places, hitting as many insects as possible. Repeated spraying is necessary. Roaches are nocturnal insects and best results are obtained by working at night after the room has been in darkness for several hours.

FLEAS. Use directional spray. Thoroughly spray infested area. Direct soaking spray at floor cracks and crevices. Spray floor carpets, rugs, etc. with fine spray. Spray animals' sleeping quarters. Repeat applications as necessary.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Do not use or store near heat or an open flame. Do not smoke while spraying. Avoid inhalation of spray. Harmful if swallowed. Remove or cover foods during treatment. Cover all food processing surfaces during treatment or clean thoroughly before using. Use in food processing plants only when plant is not in operation. Do not remain in treated areas. Ventilate area after treatment.

Active Ingredients 100%

Aliphatic petroleum hydrocarbons, aromatic petroleum hydrocarbons, technical piperonyl butoxide*, pyrethrins and essential oils.

* Consists of (butylcarbityl) (6 propylpiperonyl) ether and related compounds.
