DOLGE CONCENTRATED PYRETHRUM INSECTICIDE

ESPECIALLY FORMULATED FOR APPLICATION IN MECHANICAL AEROSOL GENERATORS
FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY

FOR USE IN [illegible] CANNERIES, BOTTLING PLANTS, BREAKFAST FOOD PLANTS, FLOUR MILLS, FEED PLANTS, GRAIN ELEVATORS, HOSPITALS, HOTELS, INDUSTRIAL MILLS, [illegible] PACKING PLANTS, RESTAURANTS, RETAIL STORES, WAREHOUSES, [illegible] FOR MOTH AND FLY CONTROL

DIRECTIONS

INDOOR APPLICATION

[illegible] processing establishments should be confined to those periods when the plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. Remove pets, birds and [illegible] aquaria before spraying. Close doors and windows and shut off ventilating systems. Apply this concentrate undiluted using mechanical aerosol generating equipment. Keep area closed for a minimum of one hour. Vacate treated area and ventilate before reoccupying. To kill flies, including fruit flies, mosquitoes, gnats and small flying moths treat at a rate of ½ ounce per 1000 cubic feet of space. Repeat treatment when reinfestation occurs. To control Indian meal moth, dried fruit beetle and confused flour beetle in dried fruit in processing or storage apply at a rate of ½ gallon per 50,000 cubic feet, directing the spray initially above the trays and shelves. Do not apply directly to fruit. Repeat when reinfestation occurs. To control accessible stages of silverfish, earwigs and ants, treat at a rate of 1 ounce per 1000 cubic feet of space. Repeat treatment when reinfestation occurs. To control exposed stages of confused flour beetle, saw-toothed grain beetle, red flour beetle, rice weevil, granary weevil, cadelle, meal worms, Indian meal moth, and Angoumois grain moth, direct spray into corners, under pallets and around stacks of packaged goods at a rate of 1 ounce per 1500 cubic feet. Infested stored products should be fumigated or treated by other effective methods using an approved product intended for that purpose. TO INSURE MAXIMUM CONTROL OF CRAWLING INSECTS NAMED, FOLLOW THE ABOVE TREATMENT WITH SPOT OR LOCALIZED SURFACE SPRAYING. Fogging first flushes out the insects and makes this application more effective. Use an approved surface spray (either residual or non-residual) or dilute 1 part of this concentrate with 19 parts of oil. Apply with equipment adjusted to deliver a coarse spray. Direct spray towards insects, into cracks, crevices, around machinery, around entrances of stored products and other areas where these insects may hide.

OUTDOOR APPLICATION

To kill flies, mosquitoes, and gnats, outdoors, apply undiluted using mechanical aerosol generation equipment. For best results, treat when the temperature does not exceed 75°F and the wind velocity is not more than 5 miles per hour. With generator calibrated to deliver 0.4 ounce per minute, apply at a rate of 0.1 seconds per 1000 square feet or 4 minutes per acre. Using truck mounted equipment calibrated to deliver 0.4 ounces per minute, the above application rate will result if a 300 foot swath is treated traveling at 5 miles an hour.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not breathe spray mist. Wear mask of respirator of a type recommended by the U.S. Bureau of Mines to give adequate protection against this material. Wear protective clothing. Wash hands, arms and face with soap and water after use and before smoking. Wash all contaminated clothing with soap and hot water before re-use. Do not contaminate [illegible] Keep out of lakes, streams, ponds, tidal marshes and estuaries. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label. Do not reuse empty container. Destroy by perforating and crushing and bury in a safe place.

ACTIVE INGREDIENTS	100%
Pyrethrins	5%
*Piperonyl Butoxide Technical	5%
Petroleum Distillate	70%

*Equivalent to 20% (butylcarbityl) (6-propylpiperonyl) ether and to 5% related compounds.
