\*\*Heptachlorotetrahydro-4, 7-Methanoindene.

EPA REG. No. 1066-29

**CRE-O-TOX CHEMICAL CO.**

2670 BROAD AVE., MEMPHIS, TENN. 38112

### DIRECTIONS

Before use, read direction, warning and notice statements carefully.

Foundation Application: Apply at rate of 4 gallons chemical per 10 lineal feet to critical areas along both sides of foundation walls, interior foundation walls, around plumbing, piers, etc. Apply chemical to a depth of one foot by any convenient method that will provide a uniformly treated soil barrier. Apply to voids at or near bottom of foundation at rate of 2 gallons per 10 lineal feet. Chemical should be mixed with the soil as it is being replaced in the trench.

Pre-Treatment Application Under Slabs: Apply an overall treatment under entire surface of floor slab including porch floors and entrance platforms. Apply chemical at rate of 1 gallon per 10 square feet, except that if fill under slab is gravel or other coarse absorbent material, apply at rate of 1 1/2 gallons per 10 square feet. Where finished rooms are provided in basements or below grade areas, apply an overall treatment under entire surface of basement floor at rate of 1 gallon per 10 square feet, except that if fill under slab is gravel or other coarse absorbent material, apply at rate of 1 1/2 gallons per 10 square feet.

Annual inspection should be made of property treated.

For use by professional pest control operators as a soil poisoning agent. **FOR THE CONTROL OF SUBTERRANEAN TERMITES.**
