DIRECTIONS

SURFACE TREATMENT - For control of exposed stages of ants, flies, mosquitoes, gnats, silverfish, crickets, roaches, spiders, scorpions, wasps, hornets, flying moths and skippers, granary weevil, rice weevil, confused flour beetle, sawtooth grain beetle, cadelle, meal worms, grain mites, angoumois grain moths, rust red flour beetles and Mediterranean flour moths: Adjust nozzle of spray equipment to deliver coarse, wet particles. Direct spray onto exposed surfaces of walls, floors, baseboards, cupboards, shelving, etc. Pay particular attention to cracks, crevices, holes and other possible hiding places. Spray liberally for deep penetration. Repeat application as necessary.

SPACE SPRAYING - For the control of flies, mosquitoes, gnats, silverfish, crickets, roaches, spiders, scorpions, wasps, hornets, flying moths and skippers, granary weevil, rice weevil, confused flour beetle, sawtooth grain beetle, cadelle, meal worms, grain mites, angoumois grain moths, rust red flour beetles and Mediterranean flour moths: Adjust nozzle of spray equipment to deliver fine, moist particles. Keep doors and windows closed during spraying, and for at least 10 minutes thereafter. Direct spray upwards and outwards, filling room with mist, using 1 to 3 ounces of spray for each 1,000 cubic feet of air space. Direct spray onto beams, rafters, ceilings, etc. For best results, allow mist to settle onto floors before opening doors and windows for airing.

Do not remain in treated area. Ventilate the area after treatment is complete.
