 A CONSOLIDATED FOODS COMPANY • RESPONSIVE TO CONSUMER NEEDS

MILLSPRAY CONCENTRATE: An insecticide concentrate, especially designed for control of certain common insect pests found about food handling, food processing and food storage plants. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when plant is not in operation. When properly diluted it may be used as a space spray to control flying insects or as a surface treatment spray for application onto infested surfaces.

Net Contents _____ Gallons

MILLSPRAY CONCENTRATE

ACTIVE INGREDIENTS 100%

Petroleum Hydrocarbons, 74.00%; Polyoxyethylene Sorbitol Mixed Ether Ester, 15.00%; Piperonyl Butoxide, Technical* 10.00%; Pyrethrins, 1.00%.

* Equivalent to 8.00% of (butylcarbityl) (6-propylpiperonyl) ether and to 2.00% of related compounds.

EPA Reg No. 1111-130-AA

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. DO NOT USE, POUR, SPILL, OR STORE NEAR HEAT OR OPEN FLAME.

Do not contaminate water by cleaning of equipment, or disposal of wastes.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.

DIRECTIONS

SPACE SPRAY -- For the rapid control of flying insects as flies, flying moths, gnats, mosquitoes, dilute 1 gallon concentrate with 9 gallons of water and apply in a good sprayer adjusted to deliver fine moist particles. Direct diluted spray towards the upper portion of the enclosure, filling the air with mist. Use 2 to 3 ounces per each 1000 cu. ft. of space. For best results keep all doors and windows closed for 15 minutes after application. Do not remain in treated areas and ventilate the area after treatment is completed.

SURFACE SPRAY -- For effective initial control of running and crawling insects as ants, roaches, crickets, spiders, silverfish, exposed cheese mites, ham mites and flour mites, dilute 1 gallon of concentrate with 4 gallons of water and apply in a good machine adjusted to deliver coarse, wet particles. Apply at the rate of 1 gallon diluted material to each 750 sq. ft. of surface area. Spray walls, floors, shelves, cracks, corners, crevices, recesses, baseboards, moldings with special attention to the most likely breeding places.

Repeat treatment where necessary with material diluted at the rate of 1 gallon concentrate to 9 gallons of water. Apply 1 gallon of diluted material per each 750 square feet of surface area.
