

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Veterinary or Farm Premises

1. Remove all animals and feed from premises, vehicles, and other equipment.
2. Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes and other facilities and fixtures occupied or traversed by animals.
3. Empty all troughs, racks, and other feeding and watering appliances.
4. Thoroughly clean all surfaces with soap or detergent and rinse with water.
5. Saturate all surfaces with the recommended disinfecting solution for a period of 10 minutes.
6. Immerse all halters, ropes, and other types of equipment used in handling and restraining animals, as well as forks, shovels, and scrapers used for removing litter and manure.
7. Ventilate buildings, vehicles, and other closed spaces. Do not house livestock or employ equipment until treatment has been absorbed, set, or dried.
8. Thoroughly scrub all treated feed racks, mangers, troughs, automatic feeders, fountains, and waterers with soap or detergent, and rinse with potable water before reuse.

For disinfection of official meat, poultry, rabbit and egg establishments

1. All food products and packaging material must be removed from the room or carefully covered and protected.
2. Remove any loose dirt, litter, etc. that might be lying on floor or attached to the equipment.
3. Thoroughly clean all surfaces with soap or detergent and rinse with water.
4. Saturate all surfaces with the recommended disinfecting solution for a period of 10 minutes.
5. Expose or soak all equipment and/or utensils with the recommended disinfecting solution for a period of 10 minutes.
6. After disinfection, all equipments and/or utensils must be thoroughly rinsed with potable water before operations are resumed.

For dipping teats as an aid in controlling bacteria that causes mastitis immediately after the cow is milked place teat into the dipping solution. Teat dipping should start one week before the cow freshens. When drying off a cow the teats should continue to be dipped once a day for 1 to 4 days. Under and teats of the cow must be thoroughly washed before milking.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS (AND DOMESTIC ANIMALS)

CAUTION:

May be harmful if swallowed. May be irritating to eyes or mucous membranes. In case of contact, immediately flush eyes with plenty of water. Get medical attention if irritation persists.

Environmental Hazards:

Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

STORAGE AND DISPOSAL

PROHIBITION: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

PESTICIDE DISPOSAL: Disinfectant mixture or waste that can not be used or chemically reprocessed should be disposed of in a landfill approved for disinfectants or buried in a safe place away from water supplies.

CONTAINER DISPOSAL: Triple rinse (or equivalent) and dispose in an incinerator or landfill approved for disinfectant containers, or bury in a safe place.

GENERAL: Consult federal, state or local disposal authorities for approved alternative procedures such as limited open burning.

For Industrial and Institutional Use Only

Use in hospitals, nursing homes, hotels, schools, motels, and other institutional facilities and factories.

Only for Sale To Use and Storage by Service Personnel

**KEEP OUT OF REACH
OF CHILDREN
WARNING**

Foaming Insurance is formulated to disinfect, deodorize, and clean. It is used in hospitals, nursing homes, hotels, schools, motels, and other institutional facilities and factories. When used as directed, **Foaming Insurance** is used to clean and disinfect inanimate washable hard surfaces such as walls, sinks, tables, chairs, linoleum, bath rooms, showers, bathtub, hangers, cabinets and bed springs.

In addition, **Foaming Insurance** deodorizes those areas which are generally hard to keep fresh smelling such as garbage cans and various areas in restrooms, and other areas which are prone to odor. It is used to disinfect hard surfaces.

When used as directed, **Foaming Insurance** is an effective disinfectant for the control of Staphylococcus aureus, Bacillus subtilis, and Pseudomonas aeruginosa. It is also effective against mold and mildew. For information on the use of **Foaming Insurance**, see the instructions on the product label.
