

A major housekeeping concern is cross-infection in hospitals, nursing homes, schools, institutions and industry. SANI-TURGE 128 has been formulated for this problem area. It cleans, disinfects and is virucidal when used as directed. Its hard surface disinfecting action will reduce the hazard of cross-infection.

DANGER:

Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, promptly drink a large quantity of milk, egg whites or gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock as well as oxygen and measures to support breathing manually or mechanically may be needed. If persistent, convulsions may be controlled by the cautious intravenous injection of a short-acting barbiturate drug.

Apply SANI-TURGE 128 to walls, floors and other hard surfaces, such as tables, chairs and bedframes with a cloth or mop.

For routine disinfecting in hospitals, nursing homes, schools, institutions and industrial uses, add one ounce per gallon of water.

At one ounce per gallon use-level SANI-TURGE 128 is virucidal against Herpes Simplex, Vaccinia and Influenza A₂ (the Hong Kong flu virus).

One ounce of SANI-TURGE 128 per gallon of water will deodorize bathrooms, garbage storage areas and other areas where bacterial growth can cause malodors.

Rinse empty container with water before discarding it.
