INERT INGREDIENTS 97.25%

FOR FLEAS ON

## DOGS AND CATS

### CAUTION:

Keep out of reach of children.

See back panel for additional cautions.

#### DIRECTIONS

For FLEAS on DOGS and CATS—The best way to use Kylex Flea Powder is to apply it all over the animal, next to the skin. When used in this manner Kylex Flea Powder is effective against dog ticks and lice as well as fleas, and furnishes protection against reinestation for a limited time. Inspect the animal frequently, and repeat this treatment when necessary.

A second method, which is slower to produce results, and is effective only against fleas, is to apply Kylex Flea Powder to one spot on the animal's back. Cover an area about the size of the animal's head; rub down to skin. Repeat in 30 hours if necessary.

For LICE on DOGS, CATS ~~and~~  
Dust all over, next to skin. Repeat when necessary.

CAUTION: Avoid inhalation of dust.

Do not use on food crop within 1 day of harvest.
