

DIRECTIONS

In making emulsions of Pine Oil Disinfectants always add the water to the Disinfectant rather than vice-versa. If possible the water should be about 98° Fahr.

NOTE: Be sure all dirt is swept up and removed before applying disinfectant and that disinfectant solution covers all infected surfaces.

For aid as ordinary disinfection against S. Typhosa wash the infected area with a solution of 1 to 100.

URINALS AND TOILETS—Should be cleaned daily with a solution of 1/2 pint disinfectant to 10 qts. of water. When finished pour the solution down drains to thoroughly clean and deodorize them.

PUBLIC PLACES — Wash thoroughly with a solution of 1-100 so as to cover all possible areas of infection. For schools, institutions, public building, colleges, etc.

OUTDOOR RECEPTACLES—Garbage pails: wash with a 1-100 solution.

NET CONTENTS GALS.

VeriBest Pine Oil Disinfectant Coefficient 5, A.O.A.C.

ACTIVE INGREDIENTS:

Steam Distilled Pine Oil.....	80.0%
Anhydrous Soap.....	9.0
Methanol.....	2.8
