Precautionary Statements
Hazards to Humans
and Domestic Animals

CAUTION

(18 pt)

Harmful if swallowed. Do not get in eyes. Avoid contact with the skin. Avoid contamination of food and feed.

First Aid: In case of contact with eyes, flush with plenty of water for 15 minutes. Get medical attention if irritation persists. In case of skin contact, wash thoroughly with soap and water. If swallowed, drink plenty of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Seek medical attention immediately.

Environmental Hazards

This product is toxic to fish. Do not discharge treated water where it will drain into natural bodies of water. Do not contaminate domestic or irrigation water supplies. Do not use treated water on plants or grass as Leslie's Algae Control II and other pool additives could cause damage.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Storage and Disposal

(12 pt)

Store in a dry place. Do not use empty container. Wrap container and put in trash collection.

Use Directions

For Rapid, Effective Control of Most Algae Found in Swimming Pools: Leslie's Algae Control II is a non-metallic liquid algicide designed to be used as a part of a regular pool maintenance program and not as a substitute or replacement for disinfection, pH, alkalinity control, etc. USE ONLY ACCORDING TO DIRECTIONS GIVEN BELOW.

How Much to Use:

1. Initial Treatment for Prevention of Algae Growth in Clear Pool Water: Use 8 to 12 fl. oz. of Leslie's Algae Control II for every 10,000 gallons of water.
2. Initial Treatment for Pools with Visible Established Algae: Use 16 to 24 fl. oz. of Leslie's Algae Control II for every 10,000 gallons of water. Remove dead settled algae by vacuuming.
3. To Maintain Pools Free of Visible Algae Growth: Use 4 to 8 fl. oz. of Leslie's Algae Control II per 10,000 gallons of water weekly.

It is easier to prevent algae growth than to destroy established algae. Start treatment with a clear pool if possible.

Side Panel (Cont)

Method of Application:

Never mix concentrated Leslie's Algae Control II with other concentrated pool chemicals such as liquid or dry chlorine, acid or alkali. When properly diluted in the pool, however, Leslie's Algae Control II is compatible with those chemicals normally used to treat pools.

1. Shake Well before measuring out required amount of Leslie's Algae Control II.
2. Mix required amount of Leslie's Algae Control II into a bucket of water or sprinkling can.
3. Distribute the mixture uniformly through the pool water, being careful to avoid spillage or wind-carried spray.

Never apply Leslie's Algae Control II or any pool chemicals directly to pool water when bathers are in pool.
