A granular 2,4-D low volatile ester formulation for control of certain submerged weeds in ponds, lakes, and drainage ditches.

SPECIFIC USE DECOMMENDATIONS

#### CAUTION KEEP OUT OF REACH OF CHILDREN . SEE OTHER CAUTION STATEMENTS ON LABEL

#### CAUTION

Do not swallow. Avoid contact with skin, eyes, and clothing. Avoid inhaling dust. May cause skin irritation. Avoid contamination of foodstuffs.

#### **OBSERVE THESE PRECAUTIONS**

Never use AMOCO 2,4-D Granules except as recommended on this label. Never treat, or allow particles or dust to drift on desirable crops or plants, as this product, even in minute quantities, may cause severe injury to cotton, vegetables, ornamentals, flowers, grapes, tomatoes, soybeans, tobacco, fruit trees, and other plants. Do not apply on a windy day. Use amounts recommended-do not overdose. Although AMOCO 2,4-D Granules are formulated with a low volatile ester of 2,4-D, in order to seduce the hazard of vapor damage, every precaution must be exercised to prevent injury to nearby susceptible plants.

Do not store or place near fertilizers, send, plants, insecticides, or fungicides. Do not re-use empty container. Destroy by burying in a safe place. Do not use in greenhouses. Avoid contamination of irrigation water and reservoirs or other greas used for drinking water supplies.

It is safest to use separate equipment for applying AMOCO 2,4-D Granules. Clean thoroughly if equipment is used for other purposes. Do not contaminate water used for spray purposes.

#### NOTICE

Decaying vegetation in treated areas in ponds and lakes may deplete the supply of oxygen. If large areas of

MADE IN U.S.A.

water are to be treated, treat only  $\frac{1}{2}$ to 1/3 of the water area in a single operation. Fish may migrate to the untreated areas. Treat skipped areas later, after vegetation in original treated area has decayed (about 3-4 weeks). Several factors may affect the results

obtained from an application of AMOCO 2,4-D Granules. They include type of weeds, rate and stage of growth, and water movement.

**Consult your local Extension Service** Weed Specialist or Agricultural Experiment Station for more specific area recommendations.

Obtain necessary approval and/or permits for use in States or areas where required.

#### **NON-WARRANTY NOTICE**

Follow directions carefully. Seller warrants such directions to be proper and that product conforms to the descriptions on this label. Timing and method of application, weather and crop conditions, and other influencing factors in the use of the product are beyond the control of the Seller, so Seller makes no other warranty, express or implied (including a warranty of merchantability), with reference to the results or effects of use. No person has authority to make any representation not contained on this label.

#### AQUATIC WEED KILLER

A granular 2,4-D low volatile ester formulation for control of certain submerged weeds in ponds, lakes, and drainage ditches.

#### SPECIFIC USE RECOMMENDATIONS

WATER WEEDS in ponds, lakes, and drainage ditches—To kill Coon-

tail, Water Milfoil, Spatterdock, Water Lily, Creeping Waterprimrose, Water Smartweed, American Lotus, Watershield, Arrowhead, Waterwillow, and Bulrush infesting lakes, and ponds, apply one pound of AMOCO 2,4-D Granules evenly per 430 square feet of water surface. Granules settle to bottom around the weed roots and stems and slowly release 2,4-D. Effect on weeds will be evident in 4 to 8 weeks after treatment, and may last from 3 months to a year or longer. It is not effective where water is flowing rapidly. Uneven application will result in erratic control.

Applications can be made on the ice or in early spring up to early summer -earlier applications are most effective for seasonal control. If first treatment is delayed until early summer, a second treatment should be made in July or August before weed regrowth reaches a height of 10 to 12 inches. Apply when water is calm, using a boat or raft with a fertilizer spreader, or whirling plate seeder, or similar contrivance.
