NET GALLONS

AMOUNTS OF SPRAY MIXTURE TO APPLY

Aerosol Application: Mower. Dilute recommended amount of AMOCO 245-TLV to 1 million pounds of water and apply as shown.

Aerosol application: AMOCO 245-TLV is recommended for the control of non-woody plants. For the control of woody plants, an additional 245-TLV must be applied. AMOCO 245-TLV is a non-ionic detergent, containing a surfactant, that prevents the formation of a film on the surface of water. It is effective in controlling weeds, grasses, and other plants. AMOCO 245-TLV is a non-ionic detergent, containing a surfactant, that prevents the formation of a film on the surface of water. It is effective in controlling weeds, grasses, and other plants. NET GALLONS

AMOUNTS OF SPRAY MISTURE TO APPLY

Airplane Application: Use 1 gallon of AMOCO 2,4,5-T LV ester-M per 100 acres, or as otherwise directed on label. Use 1 gallon of premix per 100 acres. For other sizes or types of aircraft, use amounts directed on label.

Foliation Treatment: For general broadleaf control. Use 1 gallon of AMOCO 2,4,5-T LV ester-M per 100 gallons of water and apply to ground using ground equipment.

Basal Bark Treatment: For trees, use 1 gallon of AMOCO 2,4,5-T LV ester-M per 100 gallons of water and apply to ground using ground equipment.

STUMP TREATMENT: For treatment of stumps, use 1 gallon of AMOCO 2,4,5-T LV ester-M per 100 gallons of water and apply to ground using ground equipment.

FRILL TREATMENT: For treatment of flirings and brush, use 1 gallon of AMOCO 2,4,5-T LV ester-M per 100 gallons of water and apply to ground using ground equipment.

FOLIAGE TREATMENT:

To prevent damage to adjacent crops, apply AMOCO 2,4,5-T LV ester-M to foliage 30 to 60 days after irrigation. Do not apply to young soybeans, peanuts, or other crops which require a high level of nitrogen. Do not apply to trees or brush in areas where these crops may be grown. Do not apply to watercourses or drainage areas where these crops may be grown. Do not apply to areas which are subject to irrigation or to areas where there may be a possibility of water runoff.

Basal Bark Treatment:

To prevent damage to adjacent crops, apply AMOCO 2,4,5-T LV ester-M to bark 30 to 60 days after irrigation. Do not apply to young soybeans, peanuts, or other crops which require a high level of nitrogen. Do not apply to trees or brush in areas where these crops may be grown. Do not apply to watercourses or drainage areas where these crops may be grown. Do not apply to areas which are subject to irrigation or to areas where there may be a possibility of water runoff.

STUMP TREATMENT:

To prevent damage to adjacent crops, apply AMOCO 2,4,5-T LV ester-M to stumps 30 to 60 days after irrigation. Do not apply to young soybeans, peanuts, or other crops which require a high level of nitrogen. Do not apply to trees or brush in areas where these crops may be grown. Do not apply to watercourses or drainage areas where these crops may be grown. Do not apply to areas which are subject to irrigation or to areas where there may be a possibility of water runoff.

FRILL TREATMENT:

To prevent damage to adjacent crops, apply AMOCO 2,4,5-T LV ester-M to frill areas 30 to 60 days after irrigation. Do not apply to young soybeans, peanuts, or other crops which require a high level of nitrogen. Do not apply to trees or brush in areas where these crops may be grown. Do not apply to watercourses or drainage areas where these crops may be grown. Do not apply to areas which are subject to irrigation or to areas where there may be a possibility of water runoff.

FOLIAGE TREATMENT:

To prevent damage to adjacent crops, apply AMOCO 2,4,5-T LV ester-M to foliage 30 to 60 days after irrigation. Do not apply to young soybeans, peanuts, or other crops which require a high level of nitrogen. Do not apply to trees or brush in areas where these crops may be grown. Do not apply to watercourses or drainage areas where these crops may be grown. Do not apply to areas which are subject to irrigation or to areas where there may be a possibility of water runoff.
