# Moorman's Special Phos IGR Minerals DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product only prevents emergence of adult horn flies from the manure of treated cattle. Begin use in the spring before horn flies appear on cattle and continue feeding until cold weather restricts horn fly activity. Introduction of the product when significant numbers of adult flies are present may require use of adulticide sprays or dusts.

## Free-Choice Feeding (self-feeding)

Make sure cattle are not starved for minerals or salt by providing them before feeding MoorMan's Special Phos IGR Minerals. Then remove salt or mineral supplement and start continuous feeding of MoorMan's Special Phos IGR Minerals.

The recommended consumption of MoorMan's Special Phos IGR Minerals is 0.25 lb (1/4 lb) to 0.5 lb (1/2 lb) per 100 lb of body weight per month. Place MoorMan's Special Phos IGR Minerals near watering or loafing areas and provide one feeder for each 15 to 20 head. Put out only a 5-7 day supply of MoorMan's Special Phos IGR Minerals at one time and protect it from rain.

If consumption of MoorMan's Special Phos IGR Minerals is above 0.5 lb (1/2 lb) per 100 lb of body weight per month, reduce the number of feeding stations or relocate feeders in areas frequented less by cattle.

If consumption of MoorMan's Special Phos IGR Minerals is below 0.25 lb (1/4 lb) per 100 lb of body weight per month, increase the number of feeding stations or relocate feeders in areas more frequented by cattle.

#### Mixed Ration Feeding (hand-feeding)

When cattle are on supplemental feeds or if mineral consumption is not as recommended, mix MoorMan's Special Phos IGR Minerals with other non-medicated feeds and feed daily to provide 0.25 lb (1/4 lb) to 0.5 lb (1/2 lb) of MoorMan's Special Phos IGR Minerals per 100 lb of body weight per month.
