

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS  
& DOMESTIC ANIMALS  
CAUTION**

May be fatal if swallowed and enters airways. Avoid contact with skin and clothing. Wash thoroughly after handling.

**ENVIRONMENTAL HAZARDS**

Do not contaminate water by cleaning of equipment or disposal of wastes.

**PHYSICAL OR CHEMICAL HAZARDS**

Do not use, pour or store near heat or flame.

**DIRECTIONS**

FOR HOMEOWNER USE FOR PREVENTIVE TERMITE CONTROL IN EXISTING STRUCTURES.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**STORAGE AND DISPOSAL**

Keep product in original container. Do not contaminate water, food or food containers, dishes or cleaning equipment. Do not reuse empty container. Wrap container and put in trash collection.

**DILUTE one quart with 25 Gallons of water**

TERMITE CONTROL IN EXISTING STRUCTURE Buildings with Basements or Crawlspace

First remove all wood debris and wood forms. A round piece, pipe, chimney base and along foundation of poured concrete foundation. In the side and in the deep. If there is a hole in the side of the deep, use hole with a 2" x 2" pipe or rod about 1/2" apart that extends to the trench bottom. Make a hole in the trench. Make a hole in the trench. Apply the dilute solution in the trench at a rate of 1 gallon per 10 linear feet per foot of depth. Apply half of this to the back fill. Measure, treat in the side of foundation. For crawl space buildings, treat treated soil with a thin layer of untreated soil. For masonry, masonry, masonry, masonry. Drill hole at one foot intervals. Fill in the foundation and pour the full gallon of dilute solution into each hole. Refill holes. Slabs with heat ducts or radiating heat pipes should be treated by commercial pest control operators.

**WARNING STATEMENTS  
DANGERS TO HUMANS  
DANGERS TO DOMESTIC ANIMALS  
PRECAUTION**

If swallowed, do not breathe vapors, and do not get clothes wet and do not eat.

**ENVIRONMENTAL HAZARDS**

Prevent contamination of water by cleaning of equipment.

**CHEMICAL HAZARDS**  
Avoid contact with heat or flame.

**DIRECTIONS**

USE FOR SUBTERRANEAN TERMITES

Read Federal label on this product and use with its labeling.

**MIXING AND DISPOSAL**

Do not mix with other chemicals. Do not use in food or feed by storage, distribution, or equipment. Do not reuse empty container and put in trash collection.

**APPLICATION WITH 25 Gallons of water**

Apply to FOUNDATIONS, CRACKS, JOINTS, and Crawl Spaces.

Remove debris and wood forms. A trench 2 inches wide and 2 inches deep should be dug around the chimney bases and along foundation walls. Dig a trench 2 inches wide and 2 inches deep around the foundation. If footing is more than 12 inches from the foundation, dig a trench with a crowbar, pipe or a rod that extends from the trench to the footing. Make holes close together. Apply 1/2 gallon per 100 sq ft.

Apply the emulsion or solution at a rate of 1/2 gallon per 100 sq ft. Apply half of this to the exterior and the other half to the interior of buildings. Do not treat areas of treated soil. For concrete slabs, apply 1/2 gallon per 100 sq ft. The one-half gallon of emulsion should be applied to the slabs. Slabs containing heat pipes should be treated by control operators.

<b>ACTIVE INGREDIENTS</b>		
Chlordane Technical	72%	
Petroleum Distillates	28%	
<b>INERT INGREDIENTS</b>		100%

Contains 8 lb. Chlordane Technical per U.S. gallon of 25% 141-24-Dichloro-4,7-methanotetrahydrofane and 28% related compounds.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for advice or consult a Commercial Pest Control Service.

Avoid contamination of public and private water supplies by following these precautions. Do not allow a hose or any type of faucet extension to reach in to the termiticide chemical solution while filling or mixing this material with water. Use anti-back-flow or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing supply stores. Use of anti-back-flow equipment will help to insure that the user of this toxic chemical will not contaminate domestic water supplies. Refer to Federal (Federal Housing Administration), state and local specifications for safe distances of treatment areas from wells. Soil in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excessive saturation due to an accumulation of water or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation, treat as follows: Do Not Apply Under Pressure. Soil should be moved to an area safe from well or domestic water contamination, treated, allowed to stand undisturbed for two to four hours then returned to the trench which has been lined with 4 mil. plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

**WARRANTY STATEMENT**

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instruction.

Mr. Irvin Baker  
Seacoast Laboratories, Inc.  
P.O. Box 157  
257 Highway 19  
East Brunswick, NJ 08816

Dear Mr. Baker:

Subject: Termiticide Label Improvement Program  
Twin Light Chlordane 72% Spray  
EPA Registration No. 1159-102  
Your Application Dated November 15, 1982

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

The following revisions should be made at the next label printing:

1. Harmful if swallowed. Contact with skin can cause toxic symptoms. Wash thoroughly after handling and before smoking or eating. Do not breathe vapors. Do not get in eyes, on skin or clothing. Avoid contamination of feed or food stuffs.
2. Add the following as the first two sentences of the Environmental Hazards text:

This product is toxic to fish, birds and other wildlife.  
Keep out of lakes, streams, or ponds.

The certification for compliance with the child-resistant packaging regulations involves both the closures and associated recordkeeping. Refer to the enclosure and submit the text for item (b) on your company letterhead with date and signature.

Sincerely yours,

George T. LaRocca  
Product Manager (15)  
Insecticide-Rodenticide Branch  
Registration Division (46-767C)
