

[1159-109]

# TWIN LIGHT DUSTALL 2%

A DUSTING POWDER CONTAINING ROTENONE 2% ~~WITH OTHERS~~

## DIRECTIONS

For best results, plants should be dusted as soon as pests appear and repeated as needed. Proper application and as complete coverage as possible dusting at regular intervals, about every seven days, helps in successfully controlling pests being treated. Both lower and upper sides of the plant growth should be thoroughly dusted. Twin Light Dustall 2% may be applied any time of the day on either dry or moist foliage using 15 to 25 pounds per acre per application according to age of plants being treated.

Twin Light Dustall 2% is an insecticide dusting powder containing Rotenone 2% and other Cube Extractives 4% ~~with others~~. It is recommended for the control of Bean Beetles, Bean Leaf Beetles, Asparagus Beetles, Cucumber Beetles, Pea Aphids, Pea Weevil, Cabbage Worm (in early stages)

Blueberry Maggot, European Corn Borer.

*NOTE: Make last application no closer than 1 day before harvest on edible crops.*
