## GERMICIDAL CLEANER

An effective antibacterial and fungicidal quaternary-type detergent designed for use on all hard surfaces in Restaurants, Hospitals, Nursing Homes, Food Processing Plants, Rest Rooms, and all other places where efficient cleaning and antimicrobial action is desired. Germicidal Cleaner will also perform as an excellent deodorizer in bathroom areas, garbage pails, food storage areas, kennel areas, and all other areas where obnoxious odors develop. FOR SPECIFIC USE INSTRUCTIONS, PLEASE READ DIRECTIONAL COPY.

**WARNING:** Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Harmful or fatal if swallowed. Avoid contamination of food.

**FIRST AID:** In case of eye contact immediately flush eyes with plenty of water for at least 15 minutes, then get medical attention promptly. In case of skin contact, flush skin with plenty of water for at least 15 minutes. Remove and wash contaminated clothing before reuse. If swallowed do not induce vomiting, drink large quantities of fluid and get Medical Attention immediately.

## DIRECTIONS

### FOR GENERAL PURPOSE DISINFECTION:

To disinfect walls, floors and other hard surfaces which are lightly soiled, mop or brush with a solution of 1½ ozs. of Cleaner to 1 gallon of water.

Surfaces that are heavily soiled, should be cleaned with 1½ to 3 ozs. of Cleaner to 1 Gallon of water and then disinfected with a solution of 1½ ozs. of Cleaner to 1 gallon of water.

To disinfect locker rooms, shower stalls, walk ways around pools and other areas where fungicidal action is required, mop area with a solution containing 1½ ozs. of Germicidal Cleaner to 1 gallon of water. This solution will kill Trichophyton interdigitale, a causative agent of athlete's foot.

### DIRECTIONS

#### FOR GENERAL PURPOSE DISINFECTING:

To disinfect walls, floors and other hard surfaces which are lightly soiled, mop or brush with a solution of 1½ ozs. of Cleaner to 1 gallon of water.

Surfaces that are heavily soiled, should be cleaned with 1½ to 3 ozs. of Cleaner to 1 Gallon of water and then disinfected with a solution of 1½ ozs. of Cleaner to 1 gallon of water.

To disinfect locker rooms, shower stalls, walk ways around pools and other areas where fungicidal action is required, mop area with a solution containing 1½ ozs. of Germicidal Cleaner to 1 gallon of water. This solution will kill Trichophyton interdigitale, a causative agent of athlete's foot.

#### FOR GENERAL CLEANING:

For lightly soiled areas, surfaces to be cleaned should be mopped or brushed with a solution of 1½ ozs. of Germicidal Cleaner to 1 gallon of water.

For heavily soiled areas, mop or brush with a solution of 3 to 4½ ozs. of Germicidal Cleaner to 1 gallon of water.

#### FOR HOSPITAL DISINFECTION:

To disinfect walls, floors, furniture and other hard surfaces in Hospitals and Nursing Homes, mop or brush with a solution containing 3 ozs. of Cleaner to 1 gallon of water. This concentration will kill *Pseudomonas aeruginosa*. Surfaces that are heavily soiled with blood, fecal matter or excrement should be thoroughly scrubbed with a solution containing 3 ozs. of Cleaner to 1 gallon of water and then rinsed with a solution containing 3 ozs. of Cleaner to 1 gallon of water before disinfecting.

#### FOR SANITIZING:

To sanitize walls, floors, and equipment in Food Processing Plants, first clean thoroughly with a solution containing 1½ ozs. of Cleaner to 1 gallon of water. If surface is heavily soiled use a ratio of 3 to 4½ ozs. of Cleaner to 1 gallon of water to insure thorough cleaning. Sanitize cleaned surface with a solution containing ¾ oz. of Cleaner to 1 gallon of water. FOOD CONTACT SURFACES MUST BE RINSED WITH POTABLE WATER BEFORE REUSE.

#### FOR DEODORIZING:

To deodorize surfaces during cleaning, mop or brush with a solution containing 3 ozs. of Cleaner to 1 gallon of water. RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD.
