HOW TO APPLY LETHALAIRE V-21

GENERAL INFORMATION: Lethalair V-21 is a fast-acting, non-flammable, non-toxic, and non-corrosive insecticide. It is effective against a wide range of insects, including flies, mosquitoes, and beetles. It is suitable for use in food processing plants, restaurants, and other areas where food is handled.

PREPARATION: Before using Lethalair V-21, the area to be treated should be cleaned and free of food. The insecticide should be shaken well before use. The nozzle of the spray can should be held at a distance of about 12 inches from the surface to be treated. The spray should be directed at the insects, and the can should be moved back and forth to cover the area evenly.

APPLICATION: Lethalair V-21 should be applied to the surfaces of food processing equipment, such as conveyor belts, mixers, and grinders. It should also be applied to the walls and ceiling of the room. The application should be repeated every 24 hours for the first 3 days, and then once a week thereafter. The treated area should be kept closed for at least 30 minutes after application.

STORAGE: Lethalair V-21 should be stored in a cool, dry place, away from food and other materials. The container should be kept tightly closed when not in use. It should be kept out of the reach of children and pets.

STORAGE PRECAUTIONS (Applicable Stages):
(1) **WATER SUPPLY AND VENTILATION:** Do not allow water to enter the container. Do not allow water to enter the container. Do not allow water to enter the container.
(2) **WATER SUPPLY AND VENTILATION:** Do not allow water to enter the container. Do not allow water to enter the container. Do not allow water to enter the container.

Use in food processing plants only when plant is not in operation. All food processing surfaces should be cleaned or thoroughly disinfected before using. Food should be removed or protected during the treatment.
