HANDI-CLEAN

PROFESSIONAL-STRENGTH INSECTICIDE

USE IN Restaurants • Diners • Drive-Ins • Hotels •
Motels • Schools • Hospitals • Institutions • Grocery
Stores • Supermarkets • Drug Stores • Etc.

HOW TO OPERATE

This aerosol package has a Spray-Anyway valve and may be used in either an upright or inverted position.

HANDY • EFFECTIVE • FAST • CLEAN • ECONOMICAL

HOW TO APPLY

FLYING ADULT MOTHS, FLIES, MOSQUITOES, WASPS, GNATS: Ascertain cubic feet of space to be treated. Close doors and windows. Pointing nozzle upward, direct the aerosol mist to all parts of the room, especially windows and other light sources which attract these insects. Keep nozzle in constant motion at least 36 inches from fabrics. Apply for 1 second per 1,000 cu. ft. of space. Spraying closer than 36 inches or longer than indicated may cause stains on fabrics, furs and other materials. Keep room closed 15 minutes after each treatment.

OUT OF DOORS: For temporary protection from mosquitoes and flies, spray along ground and bushes. Frequent repeated applications may be necessary.

SILVERFISH, ANTS, ROACHES and CRICKETS: Ascertain square feet of space to be treated. Open all doors, cabinets, closets, etc. Direct the mist toward insects into cracks, crevices, and trails on door sills and window frames. For initial cleanup, apply for 10 or 15 seconds per 100 square feet of floor space. Follow up with periodic applications as a space aerosol at 3 to 5 seconds per 1,000 cu. ft. of space. Close room for one hour. Repeat treatment, as necessary. Do not spray directly on clothes, fabrics or other materials.

STORED PRODUCT INSECTS (Accessible Stages)

(1) Such as **FLOUR BEETLES AND WEEVILS**—Direct treatment toward insects into cracks, crevices, around machinery, around containers or stored products and other areas that may harbor insects. Hit as many insects as possible. A minimum dosage of 30 seconds treating time per 100 sq. ft. of floor space is recommended, leaving treated area tightly closed for at least 45 minutes. Repeat treatment as required.

(2) Such as **INDIAN MEAL (CHOCOLATE) and FLOUR MOTHS**—Close doors and windows. Direct aerosol to all parts of the room, especially into dark enclosures and around stored product containers, etc. where adult moths may be resting. Use a minimum dosage of 6 to 8 seconds treating time per 1,000 cu. ft. of space. Leave treated area closed 30 minutes. Repeat treatment weekly or as other flying moths appear.

CAUTION

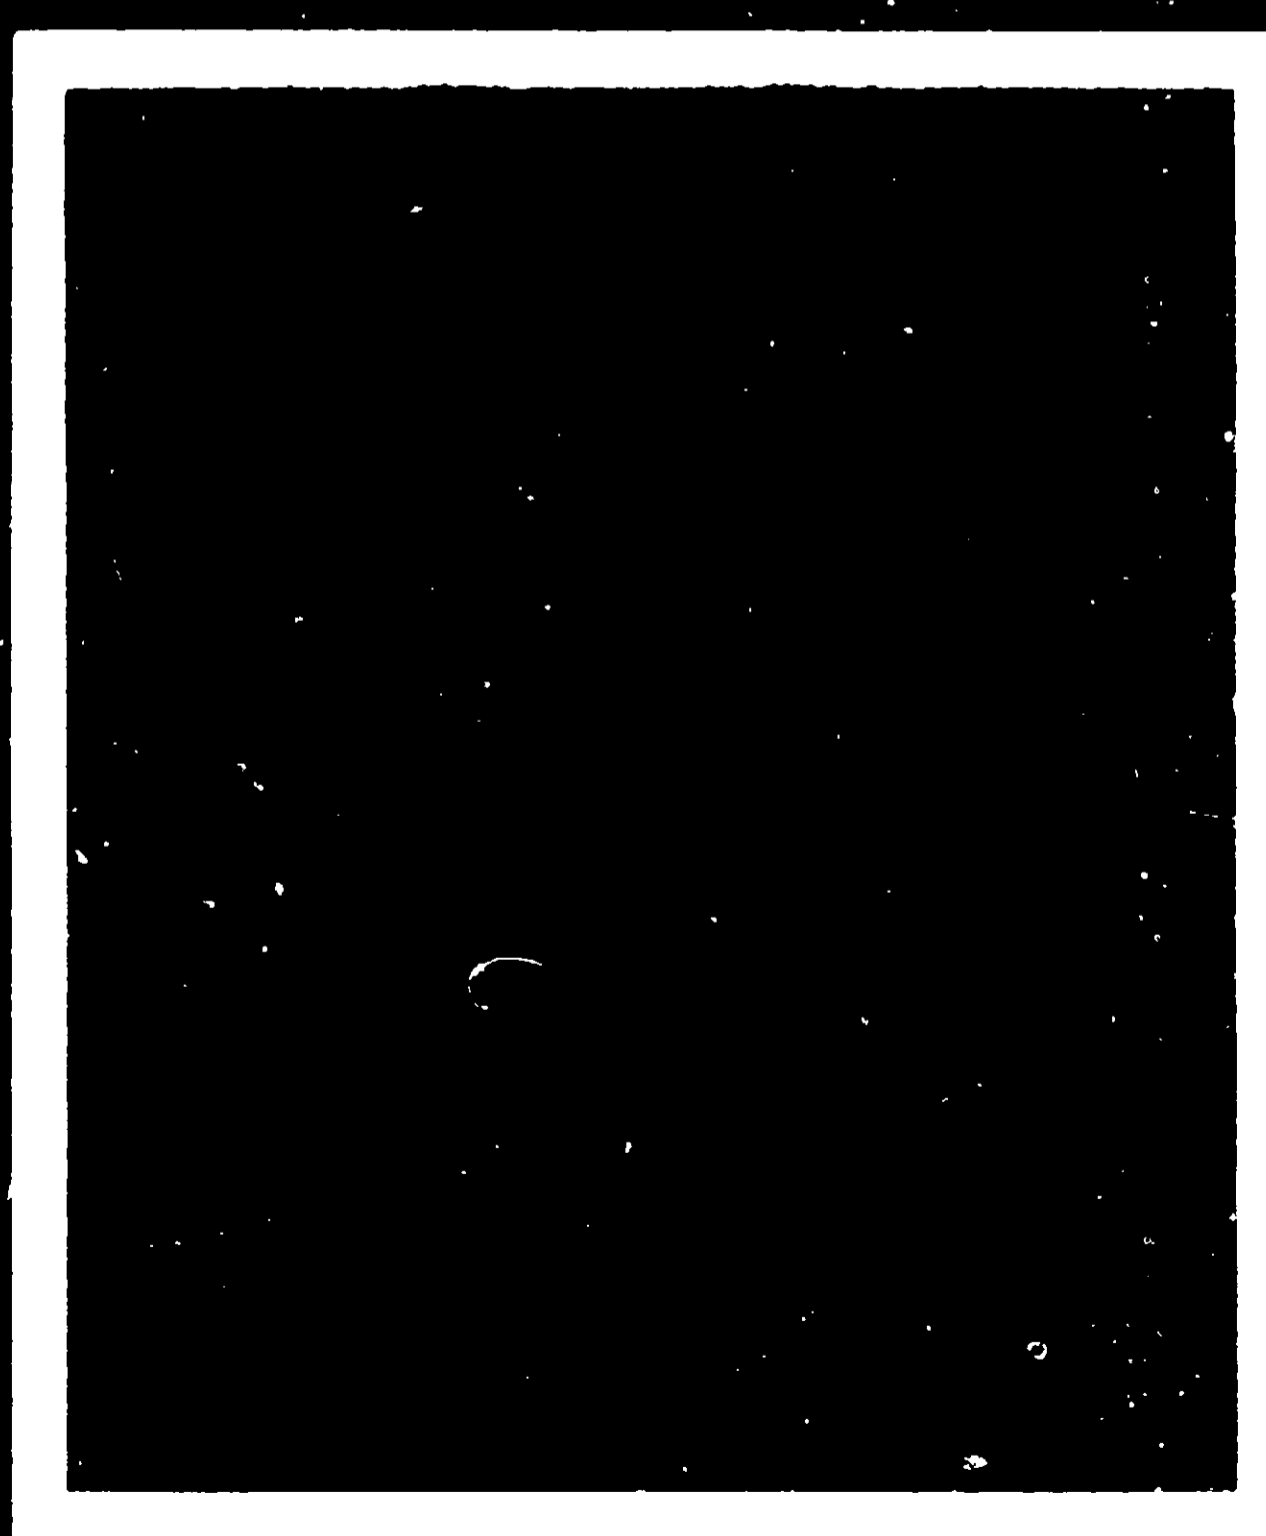

This non-refillable can contains a liquid under pressure. Never puncture this can. Store in a cool place and never expose it to temperatures higher than 130°F. Discard in safe place when empty. Never throw in an incinerator. Do not spray directly on food, utensils, plastic or asphalt tile. Persons hypersensitive to ingredients on the label may suffer irritation and should avoid exposure to the aerosol mist. Never use this product in any room where live fish or other aquatic or cold blooded life is kept.

Use in food processing plants only when plant is not in operation. All food processing surfaces or utensils should be covered or thoroughly cleaned before using. Remove or cover foods to protect them from spray or dead or falling insects.
