USDA Reg. No. 1107-

Lethalaire B-11 gives long lasting protection against mosquitoes, deer flies, sand flies, black flies, stable or dog flies, midges, punkies, no-see-ums, gnats, chiggers, and ticks. Repels fleas from skin. Spray metal screens to deter entry of small insects. Non-greasy--pleasantly scented--resists removal by rub-off and perspiration.

DIRECTIONS: Hold valve 8 to 10 inches from skin or clothing. Moisten surfaces lightly. Do not spray face; instead, spray hand and spread on face and neck. Wipe palms before touching objects. Keep away from eyes and mouth. For ticks and chiggers spray socks, pants, cuffs, and openings in clothing. Can be safely used on nylon, wool or cotton and may be reapplied as needed.

CAUTION: Avoid contact with eyes and lips. Do not smoke while spraying. DO NOT EXPOSE SPRAYED SURFACES NEAR FIRE OR FLAME UNTIL ALCOHOL HAS EVAPORATED. Do not spray on furniture, painted surfaces, plastics, eyeglass frames, watch crystals, rayon, saran and dynel fibers, as these may be damaged. DO NOT PUNCTURE, INCINERATE OR STORE ABOVE 110°F. Contents under pressure, overheating may cause container to explode.
