DIRECTIONS FOR USE

Aerosol Bee and Wasp Killer contains a highly effective insecticide formulation specially designed for use in controlling bees and wasps. The long range 6-8 foot jet-stream Insecticide kills these insect pests from a safe distance.

Remove protective cap. Hold aerosol dispenser upright. Point valve away from face. Push button to release jet-stream. Aim at nests which may be in trees, under eaves, chimneys, cracks, or crevices in buildings, holes in the ground, under rocks, utility poles, etc. Spray 3 to 5 seconds for average size nests, more if necessary. Be sure entire nest and all insects are contacted with spray.

The jet-stream allows you to stand 6-8 feet away from the nests, giving you reasonable safety in killing wasps, bees, hornets, yellow jackets, ants, spiders.

SPECIFICATIONS OF LIQUID CONCENTRATE

Flash Point . . . None

Dielectric Breakdown Voltage . . . 34 kv

CAUTION

Do not use indoors. Avoid contact with skin and eyes; if contacted wash with soap and water. Harmful if swallowed.

This non-refillable can contains a liquid under pressure. Never puncture or incinerate the container. Store in a cool place and never expose to a temperature higher than 120 F. Discard in safe place when empty. Avoid breathing of spray mist. Do not use on foliage.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
