

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS  
WARNING**

May be fatal if swallowed. Do not breathe vapor, dust, or spray mist. Do not get in eyes, on skin or clothing. In case of skin contact, wash immediately with soap and water. Avoid contamination of feed and foodstuffs.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish, birds, and other wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, streams and ponds. Do not apply where runoff is likely to occur. Do not apply when weather favors drift from treated areas. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

**PHYSICAL OR  
CHEMICAL HAZARDS**

Do not use, pour, spill or store near heat or open flame.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**STORAGE AND DISPOSAL  
PROHIBITIONS**

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

**DISPOSAL**

Do not reuse empty container. Wrap container and put in trash collection.

BRAND

1/2 GALLON

**CHLORDANE 72 Non-Professional**

**ACTIVE INGREDIENTS:**

Technical Chlordane*	72.0%
Xylene Range Aromatic Solvent	3.5%
Kerosene	19.5%

**INERT INGREDIENTS:** 5.0%

\*Equivalent to 43.2% Octachloro-4, 7-Methanotetrahydroindane and 28.8% Related Compounds 100.0%

**KEEP OUT OF REACH OF CHILDREN**

**WARNING**

**STATEMENT OF PRACTICAL TREATMENT**

If swallowed- Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention immediately.  
If inhaled- Remove victim to fresh air and apply respiration if indicated.  
If on skin- Wash promptly with soap and water. Rinse thoroughly.  
If in eyes- Rinse eyes for at least 15 minutes with water and call a physician immediately.

**DIRECTIONS FOR NON-PROFESSIONAL USE** (continued from left panel)  
**CHLORDANE for Control of SUBTERRANEAN TERMITES.**  
Mix this concentrate with water by thorough agitation at the rate of one gallon of concentrate to 94 gallons of water (for a 1% solution) or one gallon to 46 gallons of water (for a 2% solution). A proper mixture will have the appearance of a milky emulsion with no free oil on the surface.

**TERMITE CONTROL IN EXISTING STRUCTURES**  
**Buildings with Basements or Crawl-Spaces**  
First remove all wood debris and wood forms. Around piers, pipes, chimney bases and along foundations of poured concrete dig a trench 6 inches wide and 4 inches deep. For brick and block foundations dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or a rod about one foot apart that extend from the trench bottom to the footing. Make holes closer in hard-packed clay soils. Never dig below the top of the footing. Apply the solution in the trench at a rate of 4 gallons per 10 linear feet per foot of depth. Apply half of this to the back-fill. Likewise, treat along the inside of foundations of crawlspace buildings. Cover treated soil with a thin layer of untreated soil, and take care to avoid contaminating water supplies.

For raised porches, terraces, and entrance slabs, drill holes at one foot intervals, 6 inches from the foundation, and pour one-half gallon of solution into each hole. Refill holes. Slabs with heat ducts or radiating heat pipes should be treated by professional pest control operators.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab-type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for advice or consult a Professional Pest Control Service.

Avoid contamination of public and domestic water supplies by following these precautions. Use antiback-flow siphonage equipment. Refer to federal (Federal Housing Administration), state and local specifications for safe distances of treatment areas from wells. Soil in the vicinity of wells should not be treated if it is watered saturated, or by injecting the solution under pressure. Remove it to an area for treatment, safe from well contamination, and return it to the trench which has been lined with plastic sheeting.

**NOTICE** The manufacturer guarantees and warrants that the active ingredient and the minimum active ingredient content and the net weight of the contents are as stated and that the directions, warnings, and other statements on this label are reasonably and fairly based upon responsible testing of effectiveness, of toxicity to plants and to laboratory animals and of residue remaining on food crops. The manufacturer makes no other express or implied guarantee, warranty or representation whatever, of a similar or different sort and none is to be inferred by the purchaser or user. Neither Carolina Chemicals, Inc. nor the seller shall be held responsible in any manner for any personal injury or property damage or other type of loss resulting from the careless or improper handling, storage or use of this material whether used as directed or in combination with other materials. The buyer for user assumes and agrees to accept all risk and liability resulting from such handling, storage or use. No modification of this paragraph is authorized except by written reference to the paragraph as written by an officer of Carolina Chemicals, Inc.
