DIRECTIONS

EAGLE MICRO-SPRAY should never be sprinkled—use a sprayer which throws a cloud of fine, fog-like mist. Never use spray in a soiled or rusty sprayer, or in a sprayer partly filled with any other insecticide or substance.

FLIES, MOSQUITOES, GNATS: Close doors and windows. Spray freely towards ceiling in all directions until rooms are fogged with mist. Return after 5 or 10 minutes, air out room and sweep out the fallen insects.

BED BUGS: Take bed apart and spray slats, springs and into all cracks. Spray entire surface of mattress thoroughly, particularly the seams and tufts. Air until completely dry. Spray back of baseboards, door and window frames, loose wall paper, backs of picture frames and into all cracks and crevices of room furniture.

ROACHES, WATER BUGS, AND ANTS: Force a heavy mist of spray inside cracks and crevices around sinks, water pipes, drains, baseboards, cupboards, etc., where these insects hide. When they come out, spray them again. Spray ants and ant trails. Eagle Micro-Spray kills the ants if wet and tends to discourage other ants from following old trails. Spray thoroughly each week until insects are gone.

ESPECIALLY PREPARED FOR USE IN MICROSOL GENERATORS

EAGLE MICRO-SPRAY

U.S.D.A. Reg. No. 1200-9

Active Ingredients 100%

CONTAINS PETROLEUM DISTILLATE, TECHNICAL PIPERONYL BUTOXIDE CONSISTS OF (BUTYLCARBITYL) (6-PROPYLPIPERONYL) ETHER AND RELATED COMPOUNDS.

CAUTION: Keep Out of Reach of Children. Harmful if swallowed.

GARLAND, TEXAS

DIRECTIONS

FLEAS, TICKS and FLIES: Force a heavy mist of spray inside cracks, crevices, loose wall paper, around baseboards, floor coverings, and wall cracks, as well as sleeping quarters of animals. Do not spray directly on live stock and pets. Repeat treatment once a week until insects are gone.

OUTDOOR USE: This spray helps repel many annoying insects on the porch and lawn, at outdoor concerts and picnics. Spray frequently around gliders, chairs, and tables. Spray mats, floors, grass and into air.

CAUTION!

DO NOT SPRAY OR POUR NEAR AN OPEN FLAME.

Eagle Micro-Spray can be used around grain, food, food-products, utensils, containers, food handling and food processing equipment, but should not be applied directly upon or added to foods or food products. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray in these areas, apply only when plant is not in operation.

Eagle Micro-Spray is recommended for use in mills, elevators, granaries, bottling plants, breweries, canneries, packing houses, bakeries and other situations where effective, fast acting insecticide is required.
