1200-12

DIRECTIONS

EAGLE MILL-SPRAY should never be sprinkled — use a sprayer which throws a cloud of fine, fog-like mist. Never use spray in a soiled or rusty sprayer, or in a sprayer partly filled with any other insecticide or substance.

Use of the product should be directed toward the exposed and accessible stages of the Granary Weevil, rice weevil, flour beetle, red rust flour beetle, cadelle, angoumois grain moth, meal worms, and grain mites.

Close doors and windows. Force a heavy mist of spray inside cracks and crevices around water pipes, drains, baseboards, loose wall plaster, etc., where these insects hide. Spray freely towards ceiling in all directions until room is fogged with mist. Return after 5 or 10 minutes, air out room and sweep out the fallen insects. Spray thoroughly each week until insects are gone.

EAGLE MILL-SPRAY is for control of certain insects, pests of mills and warehouses.

ESPECIALLY PREPARED FOR USE IN MICROSOL GENERATORS

EAGLE
MILL-SPRAY

U.S.D.A. Reg. No. 1200-12

SUBJECT

CAUTION!

DO NOT SPRAY OR POUR NEAR AN OPEN FLAME.

Eagle Mill-Spray can be used around grain, food, food-products, utensils, containers, food handling and food processing equipment, but should not be applied directly upon or added to foods or food products. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray in these areas, apply only when plant is not in operation.

Eagle Mill-Spray is recommended for use in mills, elevators, granaries, bottling plants, brewries, canneries, packing houses, bakeries and other situations, where a effective, fast acting insecticide is required.
