

DIRECTIONS

For General Disinfection and Sanitation:

After cleaning, apply solution containing 1 ounce of ANTISEPT per two gallons of water for usual sanitizing and disinfection practices. To disinfect surfaces difficult to clean or in contagious areas, use 1 ounce per one gallon of water.

Sanitation of Glassware, Silverware, Cooking Utensils, Dishes, etc.

After cleaning and rinsing immerse in a sanitizing rinse made with 1 ounce of ANTISEPT in 4 gallons of water, and air dry. DO NOT USE A TOWEL. This solution is effective in water containing up to 550 ppm hardness. Follow local health department recommendations. A potable rinse water must be applied after treatment of glassware, silverware, dishes, cooking utensils, or any surface that may come in contact with food before re-use.

Mold on Walls, Ceiling, etc.

Clean surfaces thoroughly, rinse, then spray or sponge with solution containing 1 ounce of ANTISEPT per gallon of water.

Disinfection and Sanitation of Fabrics:

After washing, agitate in a solution containing 1 ounce of ANTISEPT per gallon of water. To render diapers and other linens bacteriostatic and to retard development of ammonia, one of the causes of diaper rash, immerse in solution containing 1 ounce of ANTISEPT for each ten pounds of cloth.

Cold Disinfection of Surgical Instrument:

Clean thoroughly and rinse. Immerse in a solution of 1 ounce of ANTISEPT per gallon of water for 10 minutes. Use 1 tablespoon of Eagle Corrosion Inhibitor (NaNO₂) for each gallon of water.
