KILLS ON CONTACT . . .**

The exposed stages of flies, mosquitoes, gnats, silver flies, bees, scorpions, wasps, hornets, flying moths, box-elder bugs, earwig, granary weevil, confused flour beetle, rust red beetle, sawtoothed beetle, angoumois beetle, drug store beetle, cheese skipper, mites and many others.

**RECOMMENDED FOR USE IN . . .**

Dairies, packing granaries, elevators, warehouses and other structures. An effective, fast acting insecticide is required. As a space or residual spray a rapid kill of flying stages. As a contact spray it kills certain crawling

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with labeling.

For best results, use in a good spray, or atomizer adjusted to deliver a fine mist. Treat infested areas thoroughly and repeat application as needed. If possible, keep windows and doors closed for 10 minutes after treatment.

In the control of flying insects, direct the spray toward the upper part of enclosure, and fill the atmosphere with mist, using two to three ounces per 1,000 cubic feet of space.

In the control of running and crawling pests, use as a contact insecticide, apply in a good machine adjusted to deliver a fine mist. Using approximately one gallon of material to each 375 square feet. Repeat application as needed.

In mills, elevators, and granaries, spray floors, walls and other storage and handling areas thoroughly, with particular attention to crevices, and similar protective locations. Waste grain, etc., should be removed and destroyed, and storage areas cleaned. Treat unloading and processing areas and apply the insecticide to processing and handling equipment such as the inside of hopper, conveyors, sifters, roll-housing hoppers, pick-up devices, etc. Spray thoroughly around the base of heavy machinery and equipment. Use the product as a space spray in food processing plants during normal operation. Foods should be removed or covered during spraying. Processing surfaces should be covered or thoroughly cleaned.
