

**EFFECTIVE  
KILLS ON CONTACT...**

The exposed stages of flies, mosquitoes, gnats, silverfish, crickets, spiders, scorpions, wasps, hornets, flying moths, box-elder bugs, clover mites, ants, granary weevil, confused flour beetle, rust red beetle, caddis, swiftoothed grain beetle, Illinois beetle, drug stores beetle, cheese skipper, cheese mites, and grain mites.

**RECOMMENDED FOR USE IN...**

Dairies, packing granaries, elevators, and warehouses where effective, fast acting insecticide is required. As a contact spray, it kills the flying stages. As a contact spray, it kills certain crawling stages.

**Easy to Use...**

**DIRECTIONS**

For best results, use in a good spray, or atomizer adjusted to deliver a fine mist. Treat infested areas, thoroughly and repeat application as needed. Whenever possible, keep windows and doors closed for 10 minutes after spraying. Do not remain in treated areas; ventilate the area after treatment is complete.

In the control of flying insects, direct the spray toward the upper portions of the enclosure, and fill the atmosphere with mist, using two to three ounces to each 1,000 cubic feet of space.

In the control of running and crawling pests, use as a contact and surface insecticide, apply in a good machine adjusted to deliver a coarse droplet spray, using approximately one gallon of material to each 375 square feet of surface. Spray on exposed insects. Repeat application as needed.
