

#### DIRECTIONS FOR USE

General—This product is a concentrate to be mixed with water before use. It should not be used in conjunction with soap or other anionic detergent. However it is compatible with detergents of cationic or non-ionic type.

#### HOSPITAL AND RESTAURANT USE

For disinfection of walls, floors, lavatory fixtures, sickroom utensils and other surfaces, after cleaning, use a solution containing one ounce of concentrate to two gallons of water.

Dishes, glassware, and other food utensils after cleaning can be sanitized with a solution containing one ounce of concentrate to four gallons of water. Recommended dilution should conform with local health department recommendations.

Deodorize by mopping or spraying a solution containing one ounce of concentrate to one gallon of water.

#### SANITIZATION OF DAIRY EQUIPMENT

Clean and rinse thoroughly all milk cans, pails, strainers, milking machine parts and related equipment. Then rinse with sanitizing solution containing one ounce of concentrate to four gallons of water. Allow to drain thoroughly and air dry. The same dilution is also recommended for flank and udder washing prior to milking. Follow recommendations of your health department.

This concentrate product fulfills the criteria of Appendix F of the Grade "A" Pasteurized Milk Ordinance. See Recommendations of the U. S. Public Health Service in waters up to 550 ppm (32 grains per gallon) of hardness calculated as  $\text{CaCO}_3$  when tested by the method outlined by Chambers.

#### MEAT, POULTRY AND FOOD PROCESSING PLANTS

Clean and rinse equipment thoroughly. Then scrub with a solution of one ounce of concentrate to 4 gallons of water. On surfaces difficult to clean completely, such as meat cutting boards, increase strength of solution to one ounce to one gallon of water. Allow

#### DIRECTIONS FOR USE (Cont'd)

surfaces to drain thoroughly and air dry before use.

#### FOR HAND SANITIZING RINSE:

After the hands have been washed with soap or detergents and rinsed thoroughly with water, rinse the hands with a solution concentration of 1/4 ounce of the concentrate to 10 gallons of water. The hands need not be rinsed following the use of this solution. Recommended for use only in federally inspected meat, poultry and food processing establishments as a hand sanitizer.

#### POULTRY HOUSES AND EQUIPMENT:

Used as directed the product is odorless, effective and provides clean sanitary drinking water. It is not corrosive to utensils.

Houses, feed utensils and water fountains should be thoroughly cleaned, disinfected and rinsed with potable water before a new flock is placed in the house. Feeders should be cleaned, disinfected and rinsed with potable water daily. Use in the hatchery to disinfect trays, incubator and hatching.

For sanitization, clean thoroughly and mop or spray with a solution containing one ounce of concentrate to four gallons of water. Dip small utensils into the solution.

For disinfection after cleaning, or where disease outbreak threatens, use one ounce of concentrate to two gallons of water.

To deodorize, use one to two ounces per gallon of water.

NOTE: Do not reuse empty container. Destroy by perforating or crushing. Bury or discard in suitable place.

#### WARNING: KEEP OUT OF REACH OF CHILDREN

Avoid contamination of food. Do not take internally. Hazardous if swallowed. Protect eyes and skin when handling concentrate. Diluted concentrate may cause skin irritation or damage to the eyes. Do not get concentrate or diluted material in eyes or on skin. In case of contact wash thoroughly with plenty of soap and water. For eyes flush immediately with plenty of water and get immediate medical attention. Do not breathe spray mist.
