Delta

EFFECTIVE, KILLS ON CONTACT . . .

The exposed stages of flies, mosquitoes, gnats, silver fish, crickets, spiders, scorpions, wasps, hornets, flying insects, box-elder bugs, clover mites, ants, granary weevil, confused flour beetle, rust red beetle, cadelle, saw-toothed grain beetle, angoumois beetle, drug store beetle, cheese skipper, cheese mites, grain mites and many others.

RECOMMENDED FOR USE IN . . .

Dairies, packing granaries, elevators, warehouses and other situations where effective, fast acting insecticide is required. As a space or vapor spray, it gives rapid kill of flying stages. As a contact spray it kills certain crawling stages.

Easy to Use . . .

DIRECTIONS

For best results, use in a good sprayer or atomizer adjusted to deliver a fine mist. Treat infested areas, thoroughly and repeat application as needed. Whenever possible, keep windows and doors closed for 10 minutes after spraying.

In the control of flying insects, direct the spray toward the upper portions of the enclosure, and fill the atmosphere with mist, using not more than 6 ounces to each 1,000 cubic feet of space.

In the control of running and crawling pests, use as a contact and surface insecticide, apply in a good machine adjusted to deliver a coarse droplet spray, using approximately one gallon of material to each 950 square feet of surface. Repeat application as needed.

In mills, elevators, and granaries, spray floors, walls and other surfaces of bin, storage and handling areas thoroughly, with particular attention to cracks, crevices, and similar protective locations. Waste grain, dust, dirt and debris should be removed and destroyed, and storage areas cleaned before spraying. Treat unloading and processing areas and apply the insecticide to conveying, processing and handling equipment such as the inside of reel conveyors, purifier conveyors, sifters, roll-housing hoppers, pick-up conveyors, et cetera. Spray thoroughly around the base of heavy machinery and equipment.

Delta CHEMICAL CORPORATION
3915 AIR PARK STREET, MEMPHIS, TENNESSEE, 38118

NOTE

When diluted one part of product to 1 1/2 parts of deodorized kerosene the resultant mixture will contain 1.0% or less of technical piperonyl butoxide as limited for use of certain insecticides covered in Section 8.4(b) (6) of the USDA Manual or Meat Inspection Procedures.

CAUTION: Keep Away From Open Flame. Harmful if swallowed. Keep out of reach of children. This solution if brought into repeated contact with the skin can cause toxic symptoms. Avoid inhalation and skin contact. In case of spillage on the skin, wash with soap and water. Avoid contamination of food products. Do not use on domestic animals, household pets, or human beings. Do not spray near or toward an open flame. If swallowed, do not induce vomiting. Call a physician.

Use the product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using.

NOTICE

The use of this product being beyond our knowledge and control and involving elements of risks if misused, we do not make any warranty expressed or implied as to the effects of any use not in explicit accordance with the claims, directions, and cautions set forth on this label.
