ACCEPTED

DEC 26 1986

The Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
under
EPA No. 1203-33

A granular, free-flowing, chlorinated, disinfecting detergent, this product destroys most molds, fungi, bacteria and viruses when used in water solution according to directions. It presents no foaming problem and is an excellent product for cleaning-in-place operations.

This product fulfills the criteria of Appendix F of the Grade "A" Pasteurized Milk Ordinance 1965 Recommendations of the U.S. Public Health Service in waters up to 500 ppm of hardness calculated as CaCO₃ when tested by the method outlined by Chambers.

The Starch-Iodide Method is applicable to the determination of available chlorine. One tablespoonful (approximately one-half ounce) to 4 gallons of water will supply a minimum of 50 ppm available chlorine.

DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Delries: The following cleaning-in-place procedure should be followed for washing and sanitizing milk handling equipment including pipelines, bulk tanks, milking equipment and other utensils.

1. Rinse system immediately after use with warm water, not to exceed 100°F, to remove visible milk residues.
2. Circulate a wash water solution containing one ounce per gallon of disinfecting detergent through the system for 10-15 minutes, holding the temperature between 120°-160°F.
3. Brush wash with the wash water solution any parts not in contact with it during the circulation.
4. Rinse with a lukewarm (85°-100°F) water solution containing one half ounce of disinfecting detergent per gallon of water, unless otherwise directed by local regulations. (This product may be used in fogging or spray mist devices for sanitizing). Allow the surface to remain moist for 10 minutes, drain and air dry before use.

5. Seal to protect the now completely sanitized system for the next use. Should recontamination occur sanitize according to local regulations before again using the system.

Regular use in this manner will minimize milkstone removal problems.

Poultry and Meat Packing Plants:
Effective general cleaning and disinfection in all departments may be accomplished through the use of one ounce of disinfecting detergent per gallon of water. For porous or difficult to clean, and disinfect surfaces 3 ounces per gallon should be used. Food handling equipment and utensils should be rinsed thoroughly with potable water following cleaning and disinfection.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE AND SPILL PROCEDURE: Store upright at room temperature. Avoid exposure to extreme temperature. In case of spill or leakage, scoop up with shovel. Dispose of with chemical waste.

PESTICIDE DISPOSAL: Pesticide, spray mixture or rinse water must be disposed of according to label instructions at or by an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent) then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other approved state and local procedure.

PRECAUTIONARY STATEMENT

Hazardous To Humans and Domestic Animals

CAUTION:

May cause skin irritation and eye damage. Do not get in eyes, on skin or clothing, wear goggles, coveralls and rubber gloves and boots when handling. Harmful if swallowed. Do not take internally.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of waste. Apply this product only as specified on this label.

PHYSICAL & CHEMICAL HAZARDS:

When used in fogging or spray devices, avoid inhalation of fog or spray mist. Wear respirator equipped with dust-mist filter.

Avoid direct contact of product with feed or food. Do not mix or store concentrated solution (above 8 ounces per gallon) in sealed containers or dangerous pressures may be generated.

FIRST AID (Practical Treatment):

If on skin or in eyes: Flush with cold water for at least 15 minutes. Call a physician.

If Inhaled: Remove to fresh air. Call a physician.

If Swallowed: Feed milk or large amounts of water, induce vomiting, and call for medical attention.

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
