BEST DOCUMENT AVAILABLE

A ready-to-use, clear liquid with pleasant odor which combines the unique potentials of two broad spectrum insecticides. It kills, not only by contact, but also by long lasting residual action and immediate penetrating fumes which reach places where insects hide.

RESIDUAL: Retains its activity for several days.

ECONOMICAL: Protects your plant, your product and your personnel.

RECOMMENDED

For industrial and food processing plants, warehouses, theatres, restaurants, garages, sheds,outhouses, garbage disposal areas, kennels, zoos and similar areas.

DIRECTIONS

APPLICATION FOR NON-FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS:

GENERAL - Use this product as furnished, without dilution, and follow instructions as given for specific insects. Do not apply to areas which will be contacted frequently by children, and do not allow them in treated areas until surfaces are dry. Do not contaminate food, water, food containers, cooking utensils or similar equipment. Do not treat animals. Do not remain in treated areas and ventilate the area after treatment is completed.

SPOT APPLICATION - For control of Cockroaches, Ants, Crickets, Clover Mites, Earwigs, Silverfish, Spiders, Centipedes, Scorpions, Pantry Pests (exposed stages of Saw-toothed Grain Beetle, Flour Beetle, Rice Weevil, Cigarette Beetle, Drug Store Beetle, and Indian Meal Moth), Brown Dog Ticks, Fleas, Carpet Beetles, Clothes Moth's Larvae, apply by means of a coarse spray or paint brush to window sills, baseboards, drainboards, under sinks and stoves, in cracks and crevices, along back of shelving, beneath book shelves, on and around water pipe openings, around heat duct openings and electrical outlets and other areas frequented by these pests.

The foregoing application will also aid in the control of Flies, Mosquitoes, Wasps, Gnats, Flying Moths, and other small flying insects. Additional measures for these pests include treatment of the outside surfaces of doors, screens, windows, around light fixtures, and other surfaces on which such insects appear. In cases of heavy infestations rooms should be thoroughly misted to envelop insects present and then keep closed for 8 to 10 minutes. Afterward, fallen insects may be swept up and discarded.

SPOT APPLICATION - May be repeated as necessary. Food, dishes, utensils, and equipment should be protected from contamination by removal or by covering and washing with clean water and suitable detergent or cleaning agent after the treatment.

Delta Foremost Chemical Corp.

3915 AIR PARK TRAIL, MEMPHIS, TENNESSEE 38117

For Carpet Beetles And Clothes Moths - Apply to baseboards and roors (including areas under carpets, along margins of carpets, and in closets), behind radiators and other lint accumulation areas, closet shelves and walls, and infested surface areas of carpeting. Such treatment will control the larval stages of clothes moths in these areas. However, clothing or woolen goods should receive a regular, suitable moth-proofing treatment for complete protection. Dry clean all treated articles before using as clothing or bedding. Fleas And Brown Dog Ticks in animal quarters may be controlled by liberal application to floors, cracks, crevices and other pest-frequented areas of kennels, pens, yards, lawns, and under houses after removing animals.

Do not treat animals directly. Replace bedding with fresh material after treatment. Repeat in 3 to 4 weeks if necessary.

APPLICATION WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS: Such as industrial plants, warehouses, bakeries, dairies, restaurants, hotels, motels, food processing plants and clubs.

LIMITED TO CRACKS AND CREVICE TREATMENT ONLY. Use spray equipment that can deliver a pencil thin stream of insecticide directly into cracks and crevices expansion joints between different elements of construction or between equipment bases and the floor, wall voids, motor housing, junction boxes, conduits or hollow equipment legs where cockroaches, ants, crickets, clover mites, earwigs, silverfish, spiders, centipedes, clothes moths, fleas and brown dog ticks hide. The intracrevicular application aids in control of carpet beetles. Care should be taken to avoid depositing the product onto exposed surfaces of food or food processing surfaces. **APPLICATION OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT, IS NOT PERMITTED.**

WARNING
Do not use in edible products areas of food processing plants, restaurants, or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. May be fatal if swallowed, inhaled, or absorbed through the skin. Avoid breathing of spray mist. Avoid contact with skin. Wash thoroughly with soap and water after handling and before eating or smoking. This product may cause cholinesterase inhibition. If poisoning occurs get prompt medical aid. Atropine is antidotal. If swallowed do not induce vomiting. Call a physician at once.

Avoid contamination of feed or foodstuffs. **KEEP OUT OF REACH OF CHILDREN,** pets, poultry, and domestic animals. This product is toxic to fish, wildlife, and birds. Do not contaminate water by cleaning of equipment or disposal of wastes. Avoid spraying directly on valuable ornamental plants or injury may occur.

Do not use, pour, spill, or store near heat or open flame. Decontaminate and destroy used containers by washing thoroughly with strong alkali and detergent solution followed by a copious water rinse. Break, crush, or puncture container, then bury or burn.

NOTICE
The use of this product being beyond our knowledge and control and involving elements of risk if misused, we do not make any warranty, expressed or implied as to the effects of any use not in explicit accordance with the claims directions and cautions set forth on this label.

Gentlemen:

Subject : DELTA FOREMOST 4812-ES AMBUSH
RESIDUAL INSECTICIDE
EPA Reg. No. 1203-35
Your letter received December 1, 1975

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, and a stamped copy is enclosed for your records.

Note that this submission was processed and accepted under the 1947 Federal Insecticide, Fungicide, and Rodenticide Act. At such time as re-registration is required or amendments are proposed, the Registration, Re-registration and Classification Procedures, as published in the Federal Register on July 3, 1975, will be applied. Refer to Section 162.23 of that document. Refer also to PR Notice 75-1 and 75-4.

Sincerely,

James H. Rea
Product Manager (13)
Insecticide-Rodenticide Branch
Registration Division (WH-567)

RECOMMENDED

Industrial and food processing plants, warehouses, theatres, garages, sheds, outhouses, garbage disposal areas, zoos and similar areas.

DIRECTIONS

APPLICATION FOR NON-FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS:

AL - Use this product as furnished, without dilution, and in accordance with instructions as given for specific insects. Do not apply to surfaces which will be contacted frequently by children, and do not apply to food, water, food containers, cooking utensils or similar surfaces. Do not remain in treated areas until surfaces are dry. Do not re-ventilate the area after treatment is completed.

APPLICATION - For control of Cockroaches, Ants, Silverfish, Earwigs, Silverfish, Spiders, Centipedes, Saw-toothed Grain Beetles, Pantry Pests (exposed stages of Saw-toothed Grain Beetle, Rice Weevil, Cigarette Beetle, Drug Store Beetle and Indian Meal Moth), Brown Dog Ticks, Fleas, Carpet Beetles, Clothes Moth's Larvae, apply by means of a coarse spray nozzle to window sills, baseboards, drainboards, under stoves, in cracks and crevices, along back of shelving, book shelves, on and around water pipe openings, around electrical outlets and other areas frequented by these pests.

Pre-treatment application will also aid in the control of Flies, Mosquitoes, Wasps, Gnats, Flying Moths, and other small flying insects. Additional measures for these pests include treatment of outside surfaces of doors, screens, windows, around light fixtures, and other surfaces on which such insects appear. In heavy infestations rooms should be thoroughly misted and kept closed for 5 to 10 minutes. Afterward, fallen insects may be swept up and discarded.

APPLICATION - May be repeated as necessary. Food, clothing, and equipment should be protected from contamination by removal or by covering and washing with clean water and suitable detergent or cleaning agent after the treatment.

For Carpet Beetles And Clothes Moths - Apply to floors (including areas under carpets, along moldings and in closets), behind radiators and other lint accumulating areas, closet shelves and walls, and infested surface areas. Such treatment will control the larval stages of these insects. However, clothing or woolen goods require regular, suitable moth-proofing treatment for complete protection. Dry clean all treated articles before using as clothing. For Fleas And Brown Dog Ticks in animal quarters, apply by liberal application to floors, cracks, crevices, and frequented areas of kennels, pens, yards, lawns, and after removing animals. Do not treat animals directly. Replace bedding immediately after treatment. Repeat in 3 to 4 weeks if necessary. APPLICATION WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS: Such as industrial plants, dairies, restaurants, hotels, motels, food processing plants and clubs.

LIMITED TO CRACKS AND CREVICE TREATMENT. Use spray equipment that can deliver a pencil stream of insecticide directly into cracks and crevices existing between different elements of construction or between bases and the floor, wall voids, motor housing, conduits or hollow equipment legs where crickets, clover mites, earwigs, silverfish, saw-toothed grain moths, fleas and brown dog ticks hide. Application aids in control of carpet beetles, taken to avoid depositing the product onto exposed surfaces. Avoid introducing the material into the air. Avoid application to food or food processing surfaces. APPLICATION WITHIN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CREVICE TREATMENT, IS NOT PERMITTED.

WARNING Do not use in edible products areas of food processing plants, restaurants, or other areas where food is consumed or processed. Do not use in serving areas while food is being prepared. May be fatal if swallowed, inhaled, or absorbed. Avoid breathing of spray mist. Avoid contact with skin. Wash thoroughly with soap and water after handling. If poisoning occurs get prompt medical aid. If swallowed do not induce vomiting.

Avoid contamination of feed or foodstuffs. REACH OF CHILDREN, pets, poultry, and other animals. This product is toxic to fish, wildlife, and aquatic life. Contaminate water by cleaning of equipment or machinery. Avoid spraying directly on valuable ornamentals. Do not use, pour, spill, or store near heat or open flame. Decontaminate and destroy used containers thoroughly with strong alkali and detergent solution. Rinse with a copious water rinse. Break, crush, or puncture containers for disposal. Do not bury or burn.

NOTICE The use of this product being beyond our control and involving elements of risk if misused, we make no warranty, expressed or implied as to the accuracy of the claims or the results to be obtained, not in explicit accordance with the claims directed set forth on this label.
