Mr. Haschal Golden  
Delta Foremost Chemical Corporation  
3915 Air Park Street  
Memphis, TN 38118

Dear Mr. Golden:

Subject: Foremost 4812-ES Ambush Residual Insecticide  
EPA Registration No. 1203-35  
Your Submission Dated April 15, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable provided that you make the labeling changes listed below before you release the product for shipment bearing the amended labeling.

- 1. Products allowing for indoor use must bear the following ventilation statement:

Use only with adequate ventilation. After using this product indoors, ventilate thoroughly before occupying enclosed spaces. Do not allow contact with treated surface until sprays have dried.

- 2. Delete "with pleasant odor" from "A ready-to-use, clear liquid with pleasant odor." The phrase is misleading and contradicts the above precaution, as well as the required safety statements which currently appear on the label (e.g., "May be fatal if inhaled . . . ." "Avoid breathing spray mist . . . .").
- 3. Under the Environmental Hazards section, delete "Avoid spraying directly on valuable ornamental plants or injury may occur."
- 4. Update the Environmental Hazards section by changing "Do not contaminate water by cleaning of equipment or disposal of wastes" to ". . . water when disposing of equipment washwaters."
- 5. Correct Malathion: O,O,dimethyl phosphorodithioate . . . mercaptosuccinate.

7. Change "Sold for Commercial and Industrial Purposes Only" to  
"Only for Sale To, Use and Storage By Pest Control Operators."

8. Change "Directions" to "Directions for Use."

Submit five (5) copies of your final printed labeling before you release  
the product for shipment.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

George T. LaRocca  
Product Manager (15)  
Insecticide-Rodenticide Branch  
Registration Division (H7505C)

Enclosure

A ready-to-use, clear liquid with pleasant odor which contains long acting pyrethrin insecticide to kill, not only by contact, but also by long lasting residual action and immediate penetrating fumes which reach places where insects hide.

**RESIDUAL:** Retains its activity for several days.

**ECONOMICAL:** Protects your plant and your product.

**RECOMMENDED:** For industrial and food processing plants, warehouses, trucking, restaurants, garages, sheds, autohouses, garbage disposal areas, kennels, zoos and similar areas.

#### DIRECTIONS

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#### APPLICATION FOR NON-FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS:

**GENERAL**—Use this product as furnished, without dilution, and follow instructions as given for specific insects. Do not apply to areas which will be contacted frequently by children, and do not allow them in treated areas until surfaces are dry. Do not contaminate food, water, food containers, cooking utensils or similar equipment. Do not treat animals. Do not remain in treated areas and ventilate the area after treatment is completed.

**SPOT APPLICATION**—For control of Cockroaches, Ants, Crickets, Clover Mites, Earwigs, Silverfish, Spiders, Centipedes, Scorpions, Pantry Beets (exposed stages of Saw-toothed Grain Beetle, Flour Beetle, Rice Weevil, Cigarette Beetle, Drug Store Beetle, and Indian Meal Moth), Brown Dog Ticks, Fleas, Carpet Beetles, Clothes Moth's Larvae, apply by means of a coarse spray or paint brush to window sills, baseboards, under sinks, in cracks and crevices, along back of shelving, beneath book shelves, on and around water pipe openings, around heat duct openings and electrical outlets and other areas frequented by these pests.

**For Carpet Beetles and Clothes Moths**—Apply to baseboards and floors (including areas under carpets, along margins of carpets, and in closets), behind radiators and other heat accumulation areas, closet shelves and walls, and infested surface areas of carpeting, such treatment will control the larval stages of clothes moths in these areas. However, clothing or woolen goods should receive a regular, suitable moth-proofing treatment for complete protection. Dry clean all treated articles before using as clothing. Fleas and Brown Dog Ticks in animal quarters may be controlled by application to floors, cracks, crevices and other pest-frequented areas of kennels, pens, yards, lawns, and under houses after removing animals.

Do not treat animals directly. Replace bedding with fresh material after treatment. Repeat in 3 to 4 weeks if necessary.

**APPLICATION WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS:** Such as industrial plants, warehouses, bakeries, dairies, restaurants, hotels, motels, food processing plants and clubs.

**LIMITED TO CRACKS AND CREVICE TREATMENT ONLY**—Use spray equipment that can deliver a central thin stream of insecticide directly into cracks and crevices, expansion joints between elements of construction or between equipment bases and the floor, wall voids, motor housing, junction boxes, conduits or hollow equipment legs where cockroaches, ants, crickets, clover mites, earwigs, silverfish, spiders, centipedes, clothes moths, fleas and brown dog ticks hide. The
