# POOL-CIDE

## CONCENTRATED SWIMMING POOL ALGICIDE

**CONTROLS ALGAE and ALGAE SLIME  
KEEPS WATER CLEAR... REDUCES ODOR**

**ACTIVE INGREDIENTS:**

n-Alkyl (60% C <sub>14</sub> , 30% C <sub>16</sub> , 5% C <sub>12</sub> , 5% C <sub>18</sub> ) dimethyl benzyl ammonium chloride	5.0%
n-Alkyl (68% C <sub>12</sub> , 32% C <sub>14</sub> ) dimethyl ethylbenzyl ammonium chloride	5.0%

<b>INERT INGREDIENTS:</b> Water	90.0%
Total	100.0%

**DANGER:**

**KEEP OUT OF REACH OF CHILDREN.** Corrosive, can cause severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food. See other side for additional warnings.

E.P.A. Reg. No. 1214-38  
E.P.A. Est. No. 1214-GA-1

NET CONTENTS: 1 U.S. GALLON

**FOR INDUSTRIAL USE ONLY.**

G-10.2-P

**POOL-CIDE** reduces the turbidity and odors around swimming pools. It kills and controls algae or algae slime which causes filter fouling, detracts from appearance, and destroys paint. Common algae, such as BLACK ALGAE, BLUE-GREEN ALGAE, and SQUARE "D" ALGAE, are easily controlled. POOL-CIDE is compatible with the usual water-treatment chemicals. By controlling algae growth with POOL-CIDE, the chlorine demand may be reduced.

Athlete's foot (Trichophyton mentagrophytes) can be controlled on hard surfaces around the pool and in the locker rooms with POOL-CIDE.

SWIMMING POOLS . . . REFLECTION POOLS . . . WATER FOUNTAINS . . . LOCKER ROOMS . . . BATHROOMS . . .

**GENERAL DIRECTIONS:**

*For Initial Treatment:*

This treatment is used when filling the pool at the beginning of the season or if visible algae growth is seen. Add 1 (one) gallon of POOL-CIDE to 50,000 gallons of pool water. Vacuum the pool after 24 hours. If visible algae are still present or reappear, repeat the application.

*For Pool Maintenance:*

A Maintenance Treatment of 1 quart of POOL-CIDE added to each 50,000 gallons of water every 3 to 5 days. In hot weather or pools having heavy loads, add the Maintenance Treatment more often.

*For Control of Athlete's Foot:*

Fungicidal concentrations of 1 1/2 ounces of POOL-CIDE per gallon of water can be applied by scrubbing shower room floors, locker room benches, bath mats and other surfaces contacted by the bare foot to aid in preventing spread of athlete's foot fungi on environmental surfaces.

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician.

**RINSE EMPTY CONTAINERS THOROUGHLY WITH WATER AND DISCARD.**

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

**FISH AND WILDLIFE PRECAUTIONS:** This product is toxic to fish. Treated affluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Apply this product only as specified by the label.
