Directions For Use

BARTLETT WD

Directions For Use

PERENNIAL WEEDS: Treat plants during dormant stage or when nearing maturity. Best results are obtained with Spring application, Summer applications are not recommended. Apply 1 or 2 gallons of BARTLETT WD per 100 sq. ft. diluted in whatever quantity of water is convenient; however, should not exceed 10 gallons of water per 100 sq. ft. For Johnson Grass, Bermuda Grass, Quack Grass and Bindweed, or other deep rooted weeds the heavy rate of 2 gallons per 100 sq. ft. is recommended. It is sometimes necessary to make a further treatment if adequate control is not secured with the first application.

CAUTION: AVOID CONTAMINATION OF SEED AND FOOD STUFFS, KEEP AWAY FROM CHILDREN AND DOMESTIC ANIMALS. HARMFUL IF SWALLOWED.

USDA Registration No. 1221-32 NON-INFLAMMABLE NON-SELECTIVE WEED KILLER

DESTROYS: Johnson Grass, Bermuda Grass, Quack Grass, Poison Ivy, Poison Oak, Bindweed, Thistle, Sand Burr and many other grasses and weeds. This weed killer attacks all types of vegetation. Use for control on areas which have no crop, such as ditch banks, fence rows, road sides, power lines, right-of-ways, around buildings and similar areas.

ACTIVE INGREDIENTS:

SODIUM CHLORATE 18.00%

SODIUM METABORATE OCTAHYDRATE 19.00%

INERT INGREDIENTS: 63.00%

NET CONTENTS GALLONS

ANNUAL WEEDS: Mix one gallon of BARTLETT WD in 10 gallons of water and apply on 150 to 200 sq. ft. Thoroughly wet with a sprayer or from a sprinkling can. All parts of the plant should be treated particularly the growing tips.

NOTE: The material is non-selective and affects all types of vegetation. Care should be exercised so that the spray will not get on lawns, trees, shrubs and other desirable plants. Do not apply to areas underlaid by tree roots. Use in crops or on fallow crop land is not recommended. Manufacturer does not guarantee complete kill of vegetation or accept responsibility for its use.

CAUTION!
KEEP OUT OF THE REACH OF CHILDREN
