EPA letter of
SEP 03 1982
Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
EPA Reg. No. 1221-37

This algicide is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of algae and being non-volatile, aids in maintaining pool water clarity and sparkle. The residual effectiveness of this algicide tends to stabilize the total chemical treatment system. This algicide is compatible with all chemicals normally used in swimming pool maintenance; however, in its concentrated form this chemical should not come into contact with high concentrations of chlorine. **DO NOT MIX THIS ALGICIDE AND CHLORINE TOGETHER** when adding to the pool. These chemicals should be handled separately.

This algicide is economical, efficient, stable.

DIRECTIONS

For an initial application use one gallon of this algicide per 25,000 gallons of water. Use one quart per 50,000 gallons of water every fifth to seventh day depending on weather and use factors. The initial dose is used when filling pool at beginning of swimming season and in a clean pool free of visible algae. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of algae, use recommended maintenance dose.

After each rain of consequence, add one quart per 50,000 gallons water. Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy accumulation of algae growth is difficult to remove. The appropriate amount of this algicide should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool. Recirculation or swimming activity will assure rapid dispersion.

TO DETERMINE POOL CAPACITY

Rectangular Pools — Length times width times average depth (in feet) times 7.5 equals gallons.

Round and Oval Pools — Average diameter times average diameter times average depth (in feet) times 5.9 equals gallons.

ALGAEICIDE FOR SWIMMING POOLS

ACTIVE INGREDIENTS:
Alkyl (C₁₂, 56%, C₁₈, 28%, C₁₇, 14%)
dimethyl benzyl ammonium chloride 10%
INERT INGREDIENTS: 90%

DANGER KEEP OUT OF REACH OF CHILDREN

(See first aid statement &
other precautions on back panel.)

EPA Reg. No. 1221 - 37
EPA Est. No. 1221-LA-1

Manufactured by:
Bartlett Chemicals, Inc. P.O. Box 50730
New Orleans, La. 70150

NET CONTENTS:

1221-37

DANGER: Keep Out of Reach of Children.
Corrosive, Causes eye damage and skin irritation. Do Not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

STATEMENT OF PRACTICAL TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

STORAGE AND DISPOSAL

Pesticide Disposal:

Pesticide, mixture or rinse water that cannot be used according to label instructions must be disposed according to applicable Federal, State or Local procedures.

Containers Disposal:

Triple rinse. Then offer for recycling or dispose of in a sanitary landfill or by incineration if allowed by State and local authorities.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Apply this product only as specified on this label.
