Industrial

Stainless Insecticide

MAINTENANCE AND SANITATION PRODUCTS

Active ingredients	100%
Technical Piperonyl Butoxide	1.13%*
Pyrethrins	0.23%
Deodorized Petroleum Distillate	98.64%

*Equivalent to 0.90% of (butyl carbonyl) (6-propyl piperonyl) ether and 0.23% of related compounds.
 An Efficient Destroyer of Flies, Mosquitoes, Roaches, Water Bugs, Moths, Ants and Silver Fish. Works Excellently in an Electric Sprayer.

DIRECTIONS

for the control of: FLIES, MOSQUITOES, and GNATS: close the room and fill with mist. Keep room closed for 10 minutes after spraying. Sweep pests from floor after the 10 minute period.

for the control of: ROACHES, WATER BUGS and SILVER FISH: spray the infested area thoroughly, working the spray into the cracks and their hiding places. Repeated spraying is recommended. The spray should be directed at the insects, making sure that the spray hits as many as possible.

for the control of: ANTS: spray the infested area thoroughly, working the spray into the cracks and their hiding places. Spray ant trails and areas around window frames and door sills. Repeated spraying is necessary. **REMOVE OR COVER EXPOSED FOOD BEFORE SPRAYING.**

for the control of: CLOTHES MOTHS: spray all articles to be protected thoroughly making sure all seams and folds have been contacted with the spray. Spray the interior surfaces of storage containers, such as closets, trunks, or any place the clothes are stored. This is important because moth larvae lurk in the lint in the cracks and crevices. The application of spray should be repeated monthly unless the treated articles are stored in a moth tight container. U.S.D.A. REG. NO. 1239-18

CAUTION: COMBUSTIBLE

Keep out of reach of children. Contains Petroleum Distillate. Harmful if swallowed.

Avoid prolonged breathing of vapor. If swallowed, call a physician immediately.

Do not use or store near heat, sparks or open flame.

ACCEPTED

DEC 29 1969

UNDER THE FEDERAL INSECTICIDE FUNGICIDE AND ROACH ACT FOR ECONOMIC PEST CONTROL
