

U.S. ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF PESTICIDES PROGRAMS
REGISTRATION DIVISION (WH-567)
WASHINGTON, D.C. 20460

EPA REGISTRATION NO. 1239-49

DATE OF ISSUANCE
28 MAY 1989

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

TERM OF ISSUANCE

NAME OF PESTICIDE PRODUCT

WTM90

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Industrial Chemical Labs, Inc.
1015 North 14 Street
Omaha, NE 68102

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase "EPA Registration No. 1239-49" to your label before you release the product for shipment.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

ACTIVE INGREDIENT:

MAY 28 1985

2-(Thiocyanomethylthio)benzothiazole Under the Federal Insecticide, Fungicide, and Rodenticide Act . . . 30.0%

INERT INGREDIENTS as amended, for the pesticide registered under EPA Reg. No. . . . 70.0%

1239-49

**KEEP OUT OF REACH OF CHILDREN
DANGER**

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Causes irreversible eye damage. Causes skin irritation. This product may cause allergic skin reactions. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

STATEMENT OF PRACTICAL TREATMENT: *If in eyes,* flush with plenty of water. Get medical attention. *If on skin,* wash with plenty of soap and water. Get medical attention. *If swallowed,* drink promptly a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Avoid alcohol. Get medical attention.

Note to physician: Probable mucosal damage may contraindicate gastric lavage.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not apply in marine and/or estuarine oil fields. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Do not use or store near heat or open flame.

NET CONTENTS _____

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with labeling.

COOLING TOWERS: WTM 90 is used to protect cooling tower water from internal or dry rot. It is applied by spraying or painting a dispersible water onto the clean wood surfaces. The amount applied should be 1000 ft² of wood surface. Soft or surface rot can also be controlled by adding WTM 90 to the recirculating cooling water at the tower. This should provide 1.25 lb of WTM 90 per 1000 gal of water. The water should be stopped for 4 to 6 hr after treatment. The shock treatment should be repeated monthly.

CONDENSING WATER: WTM 90 is used to control algae, bacteria, and fungi in cooling water systems. Before treatment, the system should be cleaned thoroughly to remove old algal growth, microbial slime, and other debris. System should then be drained, flushed, refilled with water, and treated with a dose of 0.6 to 3.7 fl oz of WTM 90 per 1000 gal water in the system. A dose of 0.2 to 1.2 fl oz per 1000 gal should be made every 1 to 2 weeks to prevent bleedoff and severity of microbiological fouling.

DRILLING FLUIDS: To inhibit bacterial and fungal degradation of drilling fluids, WTM 90 is incorporated in the drilling fluid at one percent of the total wet weight of the fluid.

PETROLEUM SECONDARY RECOVERY: WTM 90 is used to control slime-forming bacteria and fungi in oil-field water, polymer flooding systems, and other oil-field water systems at dosage rates of 0.6 to 3.7 fl oz of water treated. Additions should be made continuously or in batches to the pump at the free water knockouts, before or after injection pump. **Continuous Feed Method:** When system is noticeably fouled, add WTM 90 to the water continuously until desired degree of control is achieved. Add 0.6 to 3.7 fl oz WTM 90 per 1000 gal of water continuously, or as needed to maintain control.

Method: When system is noticeably fouled, or to maintain control, add 0.6 to 3.7 fl oz of water for 4 to 8 hr per day and 1 to 4 times per week. **CRUDE AND REFINED OILS:** WTM 90 is a preservative for crude oil and diesel oil to cause the degradation of crude oil and diesel and distillate. Add WTM 90 to the oil as it is being transferred from the shipping container. Add 0.6 to 6.0 fl oz WTM 90 per 1000 gal of oil. Addition should be made continuously to the suction side of the transfer pump.

CUTTING FLUIDS: WTM 90 is used to inhibit bacterial and fungal growth in water-soluble or emulsifiable cutting fluids and coolants used in metal cutting. Add WTM 90 to the cutting fluid at a rate that will provide 2.0% (weight/weight) after final dilution with water. WTM 90 can be added to the concentrate before dilution at a rate of 125 to 1250 times the required concentration in the diluted fluid.

BEST AVAILABLE

STORAGE & DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Do not expose to extreme temperatures. Store in high. Drums should be opened in well-ventilated areas. Leaking drums should be opened in well-ventilated areas. Leaking drums should be opened in well-ventilated areas. Leaking drums should be opened in well-ventilated areas. Spills should be absorbed in a sanitary landfill.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. If you cannot dispose of this pesticide, spray mixture, or rinseate is a violation of Federal Law. If you cannot dispose of this pesticide, spray mixture, or rinseate is a violation of Federal Law. If you cannot dispose of this pesticide, spray mixture, or rinseate is a violation of Federal Law. If you cannot dispose of this pesticide, spray mixture, or rinseate is a violation of Federal Law.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then puncture and dispose of in a sanitary landfill, or by other procedures approved by local authorities.
