ALGAE-GO "36-20"

ODORLESS - - NON-VOLATILE

For Control of Algae on:

SWIMMING POOLS - if algae growth is observed in the swimming pool, add 1 gallon of "36-20" for each 10,000 gallons of water. When growth has ceased and existing algae has withered, clean out withered algae, drain and refill. Then add 1/2 gallon of "36-20" per 10,000 gallons of water. Add 7 ozs. of "36-20" per 10,000 gallons of water every 5 to 7 days, as necessary, to maintain the proper level of active ingredients in the swimming pool, "36-20" can be added by just pouring it directly into the swimming pool or running it through the filter system, whichever is most desirable.

CLAY POTS - Prior to potting plants, dip clay pots in solution of 1 gallon "36-20" to 10 gallons water for approximately 2 minutes. Air Dry. Results - control of algae for 2 to 3 months without harm to plant life.

GREENHOUSE BENCHES - Wash down benches with a solution of 1 gallon "36-20" to 10 gallons water. Air dry.

AIR CONDITIONER WET PADS - Where greenhouse has sump or tank for circulating water through air condition system, introduce 2 to 3 ozs. of "36-20" for each 8 gallons water. Maintain algae control by adding 1 oz. "36-20" for each 8 gallons of water once a month. Where water is not circulated or reused, directly spray wet pad with solution of 2 to 3 ozs. "36-20" for each gallon of water. To maintain control, spray every two weeks with same solution.

CAUTION: Harmful if swallowed. Avoid contamination of food. Avoid contact with skin and eyes. In case of contact, flush with plenty of water. Rinse empty container thoroughly with water and discard.
